

Fishbourne Roman Palace

一、原文梳理与翻译

第一段

原文：

Fishbourne Roman Palace is in the village of Fishbourne in West Sussex, England. **Q1** This large palace was built in the 1st century AD, around thirty years after the Roman conquest of Britain, on the site of **Q7** Roman army grain stores that had been established after the invasion during the reign of the Roman Emperor Claudius in 43 AD. **Q8** The rectangular palace was built around formal gardens, the northern half of which has been reconstructed. **Q2 Q9** There were extensive alterations in the 2nd and 3rd centuries AD, with many of the original black-and-white **Q9** mosaic floors being overlaid with more sophisticated coloured ones, including a perfectly preserved mosaic of a dolphin in the north wing. **Q2 Q6** More alterations were in progress when the palace burnt down in around 270 AD, after which it was abandoned.

中文翻译：

菲什本罗马宫殿（Fishbourne Roman Palace）位于英格兰西萨塞克斯郡的菲什本村。这座大型宫殿建于公元1世纪，大约在罗马征服不列颠30年后，坐落于罗马军队的粮仓旧址上——这些粮仓是在公元43年罗马皇帝克劳狄乌斯（Claudius）统治时期入侵后建立的。这座矩形宫殿围绕着正式花园（formal gardens）而建，其北半部已被重建。公元2世纪和3世纪时进行了大规模改建（extensive alterations），许多原始的黑白马赛克地面（black-and-white mosaic floors）被更复杂的彩色马赛克取代，其中北翼保存着一幅完好无损的海豚马赛克。公元270年左右，宫殿在进一步改建期间被烧毁，随后被废弃。

出题人逻辑分析：

- 考查细节定位能力：如宫殿建造时间、地点（粮仓旧址）、改建次数等（对应题目1、2、7、9）。
- 对比信息：通过"original black-and-white...coloured ones"设置干扰项，测试考生对"alterations"的理解（题目2）。

第二段

原文：

Local people had long believed that a Roman palace once existed in the area. However, it was not until 1960 that the archaeologist Barry Cunliffe of Oxford University first systematically excavated the site, after workmen had accidentally uncovered **Q10** a wall while they were laying a water main. The Roman villa excavated by Cunliffe's team was so grand that it became known as Fishbourne Roman Palace,

and **Q13** a museum was erected to preserve some of the remains. This is administered by the Sussex Archaeological Society.

中文翻译：

当地人长期以来一直相信该地区曾存在一座罗马宫殿。然而，直到1960年，牛津大学的考古学家巴里·坎利夫（Barry Cunliffe）才首次对该遗址进行系统挖掘——此前工人在铺设自来水总管时意外发现了一堵墙（wall）。坎利夫团队发掘的罗马别墅极为宏伟，因此被称为菲什本罗马宫殿，并修建了一座博物馆（museum）来保护部分遗迹。该博物馆由萨塞克斯考古学会管理。

出题人逻辑分析：

- 考查时间顺序与因果关系：通过"not until 1960"和"after workmen..."强调发现过程（对应题目10、13）。
- 测试对"erected"（建造）的同义替换理解（题目13）。

第三段

原文：

In its day, the completed palace would have comprised four large wings with colonnaded fronts. The north and east wings consisted of suites of private rooms built around courtyards, with a monumental entrance in the middle of the east wing. In the north-east corner there was an assembly hall. The west wing contained state rooms, a large ceremonial reception room and a gallery. The south wing contained the owner's private apartments. The palace included as many as fifty mosaic floors, under-floor central heating and a bathhouse. **Q3** In size, Fishbourne Palace would have been approximately equivalent to some of the great Roman palaces of Italy, and was by far the largest known Roman residence north of the European Alps, at about 500 feet (150 m) square. **Q4** A team of volunteers and professional archaeologists is involved in an ongoing archaeological excavation on the site of nearby, possibly military, buildings.

中文翻译：

在其鼎盛时期，这座完工的宫殿包括四个带柱廊前脸（colonnaded fronts）的大型翼楼。北翼和东翼由围绕庭院（courtyards）建造的私人套房组成，东翼中央有一个宏伟的入口。东北角有一个集会大厅（assembly hall）。西翼包含国家厅、大型礼仪接待室和画廊。南翼是主人的私人公寓。宫殿内有多达50个马赛克地面、地板下中央供暖系统（under-floor central heating）和一个浴室。在规模上，菲什本宫殿与意大利的一些伟大罗马宫殿大致相当（approximately equivalent），是欧洲阿尔卑斯山以北已知最大的罗马住宅，约500英尺（150米）见方。一组志愿者和专业考古学家正在附近可能是军事建筑的遗址上进行持续的考古挖掘（ongoing archaeological excavation）。

出题人逻辑分析：

- 空间结构描述：通过方位词（ north, east, etc. ）和功能分区（ private apartments, state rooms ）考查细节记忆（ 可能对应填空题 ）。
- 比较级与最高级："by far the largest..."设置题目3的干扰项，测试对"equivalent"的理解。

第四段

原文：

Q1 The first buildings to be erected on the site were constructed in the early part of the conquest in 43 AD. Later, two timber buildings were constructed, one with clay-and-mortar floors and plaster walls, which appears to have been a house of some comfort. These buildings were demolished in the 60s AD and replaced by a substantial stone house, which included colonnades and a bath suite. It has been suggested that the palace itself, incorporating the previous house in its south-east corner, was constructed around 73–75 AD. However, Dr Miles Russell of Bournemouth University re-interpreted the ground plan and the collection of objects found, and has suggested that, given the extremely close parallels with the imperial palace of Domitian in Rome, its construction may more plausibly date to after 92 AD.

中文翻译：

该遗址上最早的建筑建于公元43年征服初期。后来，建造了两座木结构建筑（ timber buildings ），其中一座带有黏土砂浆地面（ clay-and-mortar floors ）和石膏墙（ plaster walls ），似乎是一座相当舒适的房屋。这些建筑在公元60年代被拆除，取而代之的是一座坚固的石屋（ substantial stone house ），其中包括柱廊和浴室套房。有人认为，宫殿本身（ 其东南角融入了先前的房屋 ）建于公元73-75年左右。然而，伯恩茅斯大学的迈尔斯·拉塞尔（ Miles Russell ）博士重新解读了平面图和发现的物品，认为鉴于其与罗马图密善（ Domitian ）皇宫极为相似，其建造时间更可能在公元92年之后。

出题人逻辑分析：

- 时间线梳理：通过多个时间节点（ 43 AD, 60s AD, 73 – 75 AD, 92 AD ）考查事件顺序（ 题目1 ）。
- 观点对比："It has been suggested..."与"However..."引出不同学术观点，测试考生对争议信息的处理（ 可能对应NOT GIVEN题型 ）。

第五段

原文：

Q5 With regard to who lived in Fishbourne Palace, there are a number of theories. For example, one proposed by Professor Cunliffe is that, in its early phase, the palace was the residence of Tiberius Claudius Cogidubnus, a local chieftain who supported the Romans and who may have been installed as king of a number of territories following the first stage of the conquest. Cogidubnus is known from a

reference to his loyalty in *Agricola*, a work by the Roman writer Tacitus, and from an inscription commemorating a temple dedicated to the gods Neptune and Minerva found in the nearby city of Chichester. Another theory is that it was built for Sallustius Lucullus, a Roman governor of Britain in the late 1st century, who may have been the son of the British prince Adminius. Two inscriptions recording the presence of Lucullus have been found in Chichester, and the redating by Miles Russell suggests that, if the palace was designed for Lucullus, then it may have been in use for only a few years, as the Roman historian Suetonius records that **Q11** Lucullus was executed by the Emperor Domitian in or shortly after 93 AD.

中文翻译：

关于谁居住在菲什本宫殿，有多种理论。例如，坎利夫教授提出，在其早期阶段，宫殿是提比略·克劳狄乌斯·科吉杜布努斯（Tiberius Claudius Cogidubnus）的住所——他是一位支持罗马人的当地首领（local chieftain），在征服第一阶段后可能被任命为多个地区的国王。科吉杜布努斯的事迹见于罗马作家塔西佗（Tacitus）的著作《阿格里科拉传》（*Agricola*）中对其忠诚的提及，以及在附近奇切斯特市发现的一座纪念海神尼普顿（Neptune）和密涅瓦（Minerva）神庙的铭文（inscription）。另一种理论认为，它是为1世纪晚期的罗马不列颠总督萨卢斯提乌斯·卢库卢斯（Sallustius Lucullus）建造的，他可能是不列颠王子阿德米尼乌斯（Adminius）的儿子。奇切斯特发现了两块记录卢库卢斯存在的铭文，而拉塞尔的重新断代表明，如果宫殿是为卢库卢斯设计的，那么它可能只使用了几年，因为罗马历史学家苏埃托尼乌斯（Suetonius）记载，卢库卢斯在公元93年或之后不久被图密善皇帝处决（executed）。

出题人逻辑分析：

- 人物关系与证据：通过多个专有名词（Cogidubnus, Lucullus）及其相关证据（铭文、文献）考查细节匹配（题目5、11）。
- 因果关系："executed in 93 AD"直接对应题目11的答案。

第六段

原文：

Q5 Additional theories suggest that either Verica, a British king of the Roman Empire in the years preceding the Claudian invasion, was the owner of the palace, or Tiberius Claudius Catuarus, following **Q12** the recent discovery of a gold ring belonging to him. The palace outlasted the original owner, whoever he was, and was extensively re-planned early in the 2nd century AD and subdivided into a series of smaller apartments. **Q2** Further redevelopment was begun in the late 3rd century AD, but these alterations were incomplete when the north wing was destroyed in a fire in around 270 AD. The damage was too great to repair, and the palace was abandoned and later dismantled.

中文翻译：

其他理论认为，宫殿的主人可能是韦里卡（Verica）——克劳狄乌斯入侵前的罗马帝国不列颠国王，或是提比略·克劳狄乌斯·卡图arus（Tiberius Claudius Catuarus）——最近发现了一枚属于他的金戒指（gold

ring)。无论最初的主人是谁，宫殿的存在时间都超过了他。公元2世纪初，宫殿被大规模重新规划，细分为一系列小公寓。公元3世纪晚期开始进一步重建（further redevelopment），但这些改建尚未完成，北翼便于公元270年左右在一场火灾中被毁。损坏过于严重无法修复，宫殿被遗弃并随后被拆除（dismantled）。

出题人逻辑分析：

- 补充证据：通过"gold ring belonging to him"考查具体物品与人物的关联（题目12）。
- 否定信息："the damage was too great to repair"暗示火灾后的状态，与题目6的"被当地人烧毁"形成对比（题目6答案为NOT GIVEN）。

第七段

原文：

Q13 A modern museum has been built by the Sussex Archaeological Society, incorporating most of the visible remains, including one wing of the palace. The gardens have been replanted using authentic plants from the Roman period.

中文翻译：

萨塞克斯考古学会建造了一座现代博物馆（modern museum），融合了大部分可见遗迹，包括宫殿的一个翼楼。花园已使用罗马时期的正宗植物（authentic plants）重新种植。

出题人逻辑分析：

- 现状描述："modern museum has been built"直接对应题目13的答案，考查对"preserve"的同义替换理解。
