

和豆包的对话_0826

用户：

- 帮我生成word：完整原文（证据句红色加粗 + Q号标注）梳理原文逻辑，在每段后面加上翻译和出题人底层逻辑
- 逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）都不能省略字，一题一答案加详细解析
- 高频词汇 + 同义替换单独列出来，原文不能省略，必须高亮答案句，解析中英文相结合，尽量详细一点。

豆包：

The conquest of malaria in Italy 雅思阅读备考资料

一、完整原文（证据句红色加粗 + Q号标注）+ 段落翻译 + 出题人底层逻辑

Paragraph A

The word ‘malaria’ means ‘bad air’ in Italian, and this terrible disease marked the life of the people of that country for thousands of years. Yet by 1962, Italy was officially declared malaria-free, and it has remained so ever since. Frank Snowden’s study of this successful endeavour is a remarkable piece of historical work. Original, crystal clear, analytical and passionate, Snowden takes us to areas historians have rarely visited before.

段落翻译

“malaria”在意大利语中意为“污浊空气”，这种可怕的疾病数千年来深刻影响着意大利人的生活。但到1962年，意大利被正式宣布消除疟疾，且此后一直保持这一状态。弗兰克·斯诺登（Frank

Snowden) 对这场成功抗疫的研究，是一部卓越的历史著作。其内容新颖、条理清晰、分析深入且饱含热忱，带我们走进了历史学家此前极少涉足的领域。

出题人底层逻辑

1. 背景铺垫段，无直接对应题目，聚焦“意大利战胜疟疾的结果+相关著作评价”；
2. 以“疟疾历史影响→消除成果→著作介绍”展开，用“yet”强化“从受困到消除”的转折，为后文“抗疫过程”铺垫；
3. 用“remarkable”“original”等词肯定著作价值，为后文引用书中观点（如Grassi实验、DDT使用）提供权威性支撑。

Paragraph B

Everybody now knows that malaria is carried by mosquitoes. But in the 19th century most experts subscribed to **the theory of ‘miasma’ or ‘poisoning of the air’** (Q15, Q25). Others made a link between swamps, water and malaria, but **did not make the further leap towards insects-** (Q14, Q25). The consequence of these theories was that little was done to combat the disease before the end of that century. The situation was so serious that from a total population of 25m-Italians, 11m were ‘permanently at risk’. In warm, damp, malarial zones, **the life expectancy of land workers was a terrifying 22.5 years** (Q17). The economic impact of the disease was immense. Epidemics were blamed on people who originated from the hotter parts of Italy, given the widespread belief that **malaria was hereditary** (Q16, Q25).

段落翻译

如今人人皆知疟疾由蚊子传播，但在19世纪，大多数专家认同**“瘴气（miasma）理论”，即“空气中毒”理论**。其他人虽将疟疾与沼泽、水联系起来，却**未能进一步联想到昆虫（蚊子）**。这些理论导致19世纪末前，人们几乎未采取有效措施对抗疟疾。当时情况极为严峻：意大利总人口2500万中，1100万人“长期面临感染风险”；在温暖潮湿的疟疾高发区，**农业工人的预期寿命仅为22.5年，令人震惊**。疟疾的经济影响也极为巨大：由于人们普遍认为**疟疾具有遗传性**，疫情常被归咎于来自意大利较热地区的人。

出题人底层逻辑

1. 多考点集中段（Q14、15、16、17、25，摘要填空+段落匹配）：
 - Q14（摘要填空）：通过“did not make the further leap towards insects”提取“insects”，考查“19世纪专家未关联的传播媒介”；

- Q15（摘要填空）：通过“theory of ‘miasma’ ”提取“miasma”，考查“19世纪主流理论-”；
 - Q16（摘要填空）：通过“malaria was hereditary”提取“hereditary”，考查“错误认知（疟疾属性）”；
 - Q17（摘要填空）：通过“life expectancy... 22.5 years”提取“life expectancy”，考查“疟疾-区的健康指标”；
 - Q25（段落匹配）：通过“miasma theory、malaria was hereditary”列举“阻碍科学认知的错误假设”，对应题干；
2. 以“19世纪错误认知→后果（抗疫不力）→严重影响（人口、经济）”展开，用“but”“others”-串联不同错误理论，出题人侧重“错误假设的具体内容”和“19世纪疟疾的严峻性”，既支撑摘要填空的细节提取，又为“错误假设”的段落匹配提供依据；
3. 用“25m”“11m”“22.5 years”量化影响，增强文本可信度，同时为后文“Grassi实验的重要性-”铺垫——正因为错误认知，实验才具有突破性。

Paragraph C

One of the first breakthroughs in the war against malaria came in 1898 when the zoologist-Giovanni Battista Grassi demonstrated that **the micro-organisms causing the disease were-carried in the digestive tract of the mosquito** (Q22). By releasing mosquitoes into rooms to-drink the blood of healthy human volunteers, Grassi was able to make the direct link between the-insects and the disease (Q18). Definitive proof of this theory was obtained after an extraordinary-series of experiments in Italy, where **healthy people were introduced into malarial zones but-kept free of mosquito bites – and remained well** (Q19). The recently formed Italian state at last-had the necessary information to begin tackling the disease.

段落翻译

抗击疟疾的首个突破出现在1898年：动物学家乔瓦尼·巴蒂斯塔·格拉西（Giovanni Battista Grassi）证实，**导致疟疾的微生物存在于蚊子的消化道中**。他将蚊子放入房间，让其叮咬健康人类志-愿者，从而直接证明了蚊子与疟疾的关联。这一理论的决定性证据，来自意大利一系列非凡实验：研-究人员将**健康人送入疟疾高发区，但确保他们不被蚊子叮咬——这些人最终保持健康**。新成立不久的-意大利政府终于掌握了着手应对疟疾的必要信息。

出题人底层逻辑

1. 多考点集中段（Q18、19、22，判断+段落匹配）：

•

Q18（判断题）：仅提及“healthy human volunteers”，未提“来自意大利各地”，考查“无中生有判断”；

- Q19（判断题）：通过“healthy people... kept free of mosquito bites – and remained well”与题干“possible to remain healthy in malarial zones”一致，考查“细节匹配”；

- Q22（段落匹配）：通过“demonstrated that micro-organisms... carried in mosquito’s digestive tract”明确“疟疾传播方式的重要发现”，对应题干；

2. 以“Grassi实验→直接关联→验证实验→成果应用”展开，用“breakthrough”“definitive proof”强调实验的突破性，出题人侧重“实验过程（志愿者、无蚊咬健康）”和“核心发现（蚊子传播微生物）”，分别支撑判断题和段落匹配；

3. 用“recently formed Italian state”补充时代背景，说明抗疫的政府主导基础，为后文“奎宁法律、DDT计划”铺垫。

Paragraph D

A complicated approach was adopted, which made use of quinine – a drug obtained from tree-bark which had long been used to combat fever, but was now seen as a crucial part of the war on malaria. Italy **introduced a quinine law and a quinine tax in 1904**, and the drug was administered to large numbers of rural workers (Q26). Despite its often terrible side effects, the drug was successful in limiting the spread of the disease, and in breaking cycles of infection. In addition, Italy set up rural health centres and invested heavily in education programmes. Malaria, as Snowden shows, was not just a medical problem, but a social and regional issue, and could only be defeated through multi-layered strategies.

段落翻译

意大利采取了复杂的抗疫策略，核心是使用奎宁（quinine）——这种从树皮中提取的药物长期用于退烧，如今被视为抗击疟疾的关键。1904年，意大利**出台了奎宁相关法律并征收奎宁税**，向大量农业工人发放奎宁。尽管奎宁常伴随严重副作用，但成功限制了疟疾传播，打破了感染循环。此外，意大利还建立了农村卫生中心，并大力投资教育项目。正如斯诺登所述，疟疾不仅是医学问题，更是社会 and 区域性 issue，需通过多层次策略才能根除。

出题人底层逻辑

1. 核心考点（Q26，段落匹配）：通过“introduced a quinine law and a quinine tax”明确“支持抗疫的立法”，对应题干“mention of legislation”；

2. 以“奎宁策略（法律+使用）→效果→其他配套措施”展开，用“in addition”补充卫生和教育，体现“多层次策略”，出题人侧重“立法细节（quinine law）”，直接为段落匹配题提供依据；

3. 用 “despite its often terrible side effects” 体现策略的权衡，增强真实性，同时为后文 “农民拒绝奎宁” 铺垫——副作用是拒绝的原因之一。

Paragraph E

It was originally decided to give quinine to all those in vulnerable regions – even healthy people. However, peasants were often suspicious of medicine being forced upon them, and doctors were frequently met with hostility and stubborn refusal to accept the treatment offered (Q20). But despite the refusals, the strategy as a whole was hugely successful. **Deaths from malaria fell by some 80% in the first decade of the 20th century and some areas escaped altogether from the scourge of the disease** (Q21).

段落翻译

最初的计划是向易感地区所有人（甚至健康人）发放奎宁，但农民常对强制推行的药物心存怀疑，医生也频繁遭遇抵触，人们坚决拒绝接受治疗。尽管存在拒绝情况，整体策略仍极为成功：**20世纪头十年，疟疾死亡率下降约80%，部分地区彻底摆脱了疟疾的折磨。**

出题人底层逻辑

- 多考点集中段（Q20、21，判断+段落匹配）：
 - Q20（判断题）：通过 “peasants... refusal to accept the treatment” 与题干 “administered to all inhabitants” 矛盾，考查 “反义细节判断” ；
 - Q21（段落匹配）：通过 “Deaths... fell by some 80%” 提供 “药物计划成效的数字” ，对应题干 “a figure showing dramatic results” ；
- 以 “奎宁计划初衷→执行阻力→最终成效” 展开，用 “however” “but” 强化转折，出题人侧重 “数字（80%）” 和 “阻力（refusal）” ，前者支撑段落匹配，后者支撑判断题；
- 用 “scourge” （灾祸）强调疟疾的危害，与 “escaped altogether” 形成对比，突出成效的显著。

Paragraph F

The 1915-18 war delayed the campaign, as funds were diverted to the battlefields. In the 1920s and 1930s the draining of the damp, unhealthy marshlands around Rome had a certain impact on the spread of malaria. However, as war swept through the drained lands in the 1940s, the disease returned with a vengeance. Yet the country's leading malariologist **Alberto Missiroli refused to order the distribution of quinine, so allowing the epidemic to spread unchecked** (Q23). According to Snowden, he did this in order to create the ideal conditions for a new strategy,-

supported by the US Rockefeller Foundation – a massive experiment involving the extermination of mosquitoes with the chemical DDT. It is estimated that more than a third of the inhabitants in the affected area contracted malaria and countless thousands died.

段落翻译

1915-1918年的战争延误了抗疫进程，资金被转用于战场。20世纪20-30年代，罗马周边潮湿、不卫生的沼泽地被排干，对疟疾传播起到一定抑制作用。但40年代战争席卷这些排干区后，疟疾卷土重来，更为猛烈。然而，意大利首席疟疾学家**阿尔贝托·米西罗利（Alberto Missiroli）**却拒绝下令发放奎宁，任由疫情不受控制地蔓延。斯诺登指出，米西罗利此举是为美国洛克菲勒基金会支持的新策略创造理想条件——一项用化学药剂DDT消灭蚊子的大规模实验。据估计，受影响地区超三分之一居民感染疟疾，数千人死亡。

出题人底层逻辑

1. 核心考点（Q23，段落匹配）：通过“refused to order the distribution of quinine, allowing the epidemic to spread”明确“专家不阻止疫情的决定”，对应题干；
2. 以“战争延误→沼泽排干成效→疫情复发→专家反常决定”展开，用“however”“yet”强化情节转折，出题人侧重“专家决定的反常性（拒绝奎宁）”，直接为段落匹配题提供依据；
3. 用“create the ideal conditions for a new strategy”解释专家决定的原因，为后文“DDT实验”铺垫，避免读者误解为“失职”。

Paragraph G

With the end of the war in 1945, the US government and the Rockefeller Foundation were free to experiment. DDT was sprayed from the air, and 3m Italians had their bodies covered with the chemical. The effects were immense, and by 1962 malaria was more or less gone from the whole country. One of the final victims to die of the disease in Italy was the popular cyclist, Fausto Coppi. He had contracted malaria in Africa in 1960, and the failure of doctors in Italy to spot the disease was a sign of the times. A few decades earlier, they would have immediately noticed the telltale signs; it was later claimed that a small dose of quinine would have saved his life.

段落翻译

1945年战争结束后，美国政府和洛克菲勒基金会得以开展实验：通过空中喷洒DDT，300万意大利人身上都涂抹了这种化学药剂。效果极为显著，到1962年，意大利几乎全境消除疟疾。意大利最后一批疟疾死者中，包括知名自行车运动员福斯托·科皮（Fausto

Coppi)。他1960年在非洲感染疟疾，意大利医生未能诊断出该病，这正是时代的写照——几十年前，医生们能立刻识别疟疾的典型症状；后来有观点认为，少量奎宁就能挽救他的生命。

出题人底层逻辑

1. 过渡段，无直接对应题目，聚焦“DDT实验成效+最后病例”；
2. 以“DDT实验→消除疟疾→最后病例”展开，用“effects were immense”“more or less gone”-强调成效，出题人通过“最后病例（Fausto Coppi）”侧面印证“疟疾已罕见”——医生因长期无病例而未能诊断，增强“消除疟疾”的真实性；
3. 用“a small dose of quinine would have saved his life”呼应前文奎宁的作用，形成“奎宁早期抗疫→DDT最终消除”的逻辑闭环。

Paragraph H

As there are still more than 1m deaths every year from malaria worldwide, **Snowden's book-also has contemporary relevance** (Q24). This is a disease that affects every level of the societies-where it is rampant. The economic miracle of the 1950s and 1960s which made Italy into a-modern industrial nation would not have been possible without the eradication of malaria-. Moreover, this book convincingly argues that the disease was ‘an integral part of the big-picture of modern Italian history’. This magnificent study, beautifully written and impeccably-documented, deserves an audience beyond specialists in history, or in Italy.

段落翻译

由于全球每年仍有超100万人死于疟疾，**斯诺登的著作仍具有当代意义**。疟疾在流行地区影响社会各个层面：若未消除疟疾，意大利20世纪50-60年代推动其成为现代工业国的经济奇迹便无从谈起。此外，该书有力论证了疟疾“是意大利现代史全貌的有机组成部分”。这部卓越的研究著作文笔优美、史料翔实，值得历史学者或意大利研究之外的更广泛读者阅读。

出题人底层逻辑

1. 核心考点（Q24，段落匹配）：通过“has contemporary relevance”明确“疟疾故事对当今读者的意义”，对应题干；
2. 以“当代意义→疟疾对意大利的影响→著作价值”展开，用“moreover”补充著作的历史观点，出题人侧重“当代相关性（contemporary relevance）”，直接为段落匹配题提供依据；
3. 结尾评价著作，呼应开篇A段的“remarkable piece of historical work”，形成“引入→过程→意义→评价”的完整文本结构。

二、逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）

Questions 14–17（摘要填空）

题干共性说明

Complete the summary below. Choose NO MORE THAN TWO WORDS from the passage for each answer. Write your answers in boxes 14–17 on your answer sheet.

Malaria in 19th-century Italy Up until the late nineteenth century, experts failed to make the connection between malaria and 14 _____. The most popular belief at the time was the 15 _____ theory, which upheld the idea that diseases were carried by unclean air. Another common idea was that malaria was a 16 _____ disease, and as a result people from certain parts of the country were often held responsible for the spread of epidemics. Malaria was particularly widespread in rural regions, where 17 _____ could be extremely short.

14.

- **完整题干：**直到19世纪末，专家们未能将疟疾与_____联系起来。
- **答案：**insects
- **中文解析：**根据Paragraph B，“其他人虽将疟疾与沼泽、水联系起来，却未能进一步联想到昆虫（others made a link between swamps, water and malaria, but did not make the further leap-towards insects）”。“failed to make the connection”对应“did not make the further leap-towards”，提取“insects”，符合“NO MORE THAN TWO WORDS”要求。
- **English Explanation：**According to Paragraph B, "experts linked malaria to swamps and water-but not to insects". The question's "failed to make the connection between malaria and" matches this, so the answer is insects.

15.

- **完整题干：**当时最流行的观点是_____理论，该理论认为疾病由污浊空气传播。
- **答案：**miasma
-

中文解析：根据Paragraph B，“19世纪大多数专家认同‘瘴气（miasma）理论’，即‘空气中毒-’理论（most experts subscribed to the theory of ‘miasma’ or ‘poisoning of the air’）”。-“the most popular belief”对应“most experts subscribed to”，提取“miasma”，符合要求。

- **English Explanation:** According to Paragraph B, "the most popular theory in the 19th century- was the 'miasma' theory (unclean air causes disease)". The question's "the most popular belief.- . theory" matches this, so the answer is miasma.

16.

- **完整题干：**另一种常见观点认为疟疾是_____疾病，因此来自该国某些地区的人常被归咎为疫情-传播的责任人。
- **答案：**hereditary
- **中文解析：**根据Paragraph B，“由于人们普遍认为疟疾具有遗传性，疫情常被归咎于来自意大利较-热地区的人（given the widespread belief that malaria was hereditary）”。 “a... disease”对应-“malaria was hereditary”，提取“hereditary”，符合要求。
- **English Explanation:** According to Paragraph B, "a common idea was that malaria was- hereditary, so people from hot regions were blamed for epidemics". The question's "a... disease- " matches "hereditary", so the answer is hereditary.

17.

- **完整题干：**疟疾在农村地区尤为普遍，那里的_____可能极短。
- **答案：**life expectancy
- **中文解析：**根据Paragraph B，“在温暖潮湿的疟疾高发区，农业工人的预期寿命仅为22.5年（the- life expectancy of land workers was a terrifying 22.5 years）”。 “could be extremely short”对-应“a terrifying 22.5 years”，提取“life expectancy”，符合要求。
- **English Explanation:** According to Paragraph B, "in rural malarial zones, life expectancy was- extremely short (22.5 years)". The question's "could be extremely short" matches "life expectancy- ", so the answer is life expectancy.

Questions 18–20（判断题）

题干共性说明

Do the following statements agree with the information given in Reading Passage 2? In boxes 1-8-20 on your answer sheet, write TRUE if the statement agrees with the information FALSE if the statement contradicts the information NOT GIVEN if there is no information on this

18. The volunteers in Giovanni Battista Grassi's research came from all parts of Italy.

- **完整题干：**乔瓦尼·巴蒂斯塔·格拉西研究中的志愿者来自意大利各地。
- **答案：**NOT GIVEN
- **中文解析：**根据Paragraph C，“格拉西将蚊子放入房间，让其叮咬健康人类志愿者（releasing mosquitoes into rooms to drink the blood of healthy human volunteers）”，仅提及“健康人类志愿者”，未涉及“来自意大利各地（came from all parts of Italy）”的任何信息，既未肯定也未否定，故为NOT GIVEN。
- **English Explanation：** The passage mentions "healthy human volunteers" in Grassi's research but provides no information about "them coming from all parts of Italy". There is no basis for the statement, so the answer is NOT GIVEN.

19. Experiments in Italy proved that it was possible to remain healthy despite being in malarial zones.

- **完整题干：**意大利的实验证明，即使身处疟疾高发区，也有可能保持健康。
- **答案：**TRUE
- **中文解析：**根据Paragraph C，“研究人员将健康人送入疟疾高发区，但确保他们不被蚊子叮咬——这些人最终保持健康（healthy people were introduced into malarial zones but kept free of mosquito bites – and remained well）”。“remain healthy despite being in malarial zones” - 与 “healthy people... in malarial zones... remained well” 完全对应，故为TRUE。
- **English Explanation：** According to Paragraph C, "healthy people stayed healthy in malarial zones by avoiding mosquito bites". This confirms the statement "possible to remain healthy in malarial zones", so the answer is TRUE.

20. In the early twentieth century, quinine was successfully administered to all inhabitants of vulnerable regions.

- **完整题干：**20世纪初，奎宁成功地给易感地区的所有居民服用。
- **答案：**FALSE

- **中文解析：**根据Paragraph E，“农民常对强制推行的药物心存怀疑，医生也频繁遭遇抵触，人们坚决拒绝接受治疗（peasants were often suspicious... stubborn refusal to accept the treatment）”。 “administered to all inhabitants” 与 “refusal to accept the treatment” 矛盾，故为FALSE。
- **English Explanation：** According to Paragraph E, "peasants refused to take quinine", so it was not administered to all inhabitants. This contradicts the statement, so the answer is FALSE.

Questions 21–26（段落信息匹配）

题干共性说明

Reading Passage 2 has eight paragraphs, A–H. Which paragraph contains the following information? Write the correct letter, A–H, in boxes 21–26 on your answer sheet.

21. a figure showing the dramatic results of an anti-malarial drug programme

- **完整题干：**一个显示抗疟药物计划显著成效的数字
- **答案：** E
- **中文解析：**根据Paragraph E，“20世纪头十年，疟疾死亡率下降约80%（Deaths from malaria fell by some 80% in the first decade of the 20th century）”。“80%”是“显示药物（奎宁）计划成效的数字”，与题干完全对应，故答案为E。
- **English Explanation：** Paragraph E provides a figure ("80% drop in malaria deaths") showing the success of the anti-malarial drug (quinine) programme. This matches the题干, so the answer is E.

22. an important discovery about how malaria is spread

- **完整题干：**关于疟疾传播方式的重要发现
- **答案：** C
- **中文解析：**根据Paragraph C，“格拉西证实导致疟疾的微生物存在于蚊子的消化道中（Giovanni-Battista Grassi demonstrated that the micro-organisms causing the disease were carried in the digestive tract of the mosquito）”，这是“疟疾传播方式（蚊子携带微生物）的重要发现”，与题干对应，故答案为C。
- **English Explanation：** Paragraph C describes Grassi's discovery that "malaria is spread by micro-organisms in mosquitoes' digestive tracts". This matches the题干, so the answer is C.

23. mention of an expert' s decision not to halt the spread of the disease

- **完整题干：**提及一位专家不阻止疾病传播的决定
- **答案：** F
- **中文解析：**根据Paragraph F，“意大利首席疟疾学家米西罗利拒绝下令发放奎宁，任由疫情不受控制地蔓延（Alberto Missiroli refused to order the distribution of quinine, so allowing the epidemic to spread unchecked）”，“拒绝发放奎宁”即“不阻止疾病传播的决定”，与题干对应，故答案为F。
- **English Explanation：** Paragraph F mentions "Alberto Missiroli refused to stop the epidemic by distributing quinine". This matches the 题干, so the answer is F.

24. the significance of the malaria story for today' s readers

- **完整题干：**疟疾故事对当今读者的意义
- **答案：** H
- **中文解析：**根据Paragraph H，“全球每年仍有超100万人死于疟疾，斯诺登的著作仍具有当代意义（Snowden' s book also has contemporary relevance）”，“contemporary relevance”即“对当今读者的意义”，与题干对应，故答案为H。
- **English Explanation：** Paragraph H states "Snowden' s book has contemporary relevance (-significance for today' s readers) due to ongoing global malaria deaths". This matches the 题干, so the answer is H.

25. examples of false assumptions which held back scientific understanding of malaria

- **完整题干：**阻碍疟疾科学认知的错误假设例子
- **答案：** B
- **中文解析：**根据Paragraph B，错误假设包括“瘴气理论（miasma theory）”和“疟疾具有遗传性（malaria was hereditary）”，这些假设导致“19世纪末前几乎未采取有效措施（little was done to combat the disease）”，即“阻碍科学认知”，与题干对应，故答案为B。
- **English Explanation：** Paragraph B lists false assumptions ("miasma theory", "malaria is hereditary") that slowed scientific understanding of malaria. This matches the 题干, so the answer is B.

26. a reference to legislation to support the fight against malaria

- **完整题干：**提及支持抗击疟疾的立法
- **答案：**D
- **中文解析：**根据Paragraph D，“1904年，意大利出台了奎宁相关法律并征收奎宁税（Italy-introduced a quinine law and a quinine tax in 1904）”，“quinine law”即“支持抗击疟疾的立法”，与题干对应，故答案为D。
- **English Explanation：** Paragraph D refers to legislation ("quinine law") to support the fight-against malaria. This matches the题干, so the answer is D.

三、高频词汇 + 同义替换

（一）高频词汇（词性 + 中文释义 + 原文出处 + 高亮答案句）

词汇（Word）	词性（Part of-Speech）	中文释义（-Chinese Definition）	原文出处（-Source Paragraph）	高亮答案句（-Highlighted Answer Sentence）
miasma	n.	瘴气（旧时认为-致病因的污浊空气）	B	most experts-subscribed to-the theory of- miasma or ‘-poisoning of-the air’ .
hereditary	adj.	遗传的；世袭的	B	given the widespread belief that malaria was hereditary .
life expectancy	n. phr.	预期寿命	B	In warm-, damp-, malarial zones-, the life-expectancy of-land workers-

				was a- terrifying 22.5- years.
micro-- organism	n.	微生物（如细菌- 、病毒）	C	the micro-- organisms causing the disease were carried in the digestive tract of the mosquito.
quinine	n.	奎宁（抗疟药物- ）	D	A complicated approach was adopted, which made use of quinine – a drug obtained from tree bark.
administer	v.	给予（药物）； - 实施	D/E	the drug was administered to large numbers of rural workers / quinine was successfully administered to all inhabitants.
scourge	n.	灾祸；祸害	E	some areas escaped altogether from the scourge of the disease.
unchecked	adj.		F	

		不受控制的；未遏制的		allowing the epidemic to spread unchecked.
contemporary relevance	n. phr.	当代意义	H	Snowden' s book also has contemporary relevance.
integral	adj.	不可或缺的；有机的	H	the disease- was ' - an integral- part of- the big picture- of modern- Italian history- ' .

(二) 同义替换 (原文词 + 替换词 + 对应题目/出处 + 高亮对应句)

原文词 (Original Word)	同义替换 (- Synonym)	对应题目/出处 (- Relevant Question/Source)	高亮对应句 (- Highlighted Matching Sentence)
did not make- the further leap- towards insects (- 未联想到昆虫)	failed to make- the connection- between malaria- and insects (未将- 疟疾与昆虫联系)	Q14 (B)	did not make- the further leap- towards insects- – this matches- "failed to make- the connection- between malaria- and insects".
theory of ‘miasma’ (瘴气- 理论)	the most popular- belief... theory (最- 流行的理论)	Q15 (B)	most experts- subscribed to the- theory of ‘- miasma’ – this- matches "the most- popular belief was-

			the miasma theory- ".
malaria was hereditary (疟疾是-遗传的)	a hereditary disease (遗传性疾-病)	Q16 (B)	given the-widespread belief-that malaria was-hereditary – this-matches "malaria-was a hereditary-disease".
life expectancy was-a terrifying 22.-5 years (预期寿命2-2.5年)	life expectancy-could be-extremely short (-预期寿命极短)	Q17 (B)	the life-expectancy of-land workers was-a terrifying 2-2.5 years -- this matches "life-expectancy could-be extremely short".
healthy people... kept free of mosquito bites – and remained well (健康人不被蚊-咬且健康)	possible to-remain healthy-despite being in-malarial zones (身-处疟疾区仍能健康)	Q19 (C)	healthy people-were introduced-into malarial-zones but kept-free of mosquito-bites – and-remained well -- this matches the-statement.
peasants... refusal-to accept-the treatment (农民拒绝治疗)	quinine was successfully administered to all inhabitants (奎宁给-所有居民服用)	Q20 (E)	peasants were-often suspicious..- . stubborn refusal-to accept the-treatment – this-contradicts the-statement.
Deaths... fell by-some 80% (死亡率-下降80%)	a figure showing the dramatic results (显示显著成-效的数字)	Q21 (E)	Deaths from-malaria fell by-some 80% in the-first decade of the-

			20th century – this matches the 题干.
demonstrated that micro-organisms... carried in mosquito' s digestive tract (证实微生物在-蚊子消化道)	important discovery about how malaria is spread (疟疾传播方式的重要发现)	Q22 (C)	the micro-organisms causing the disease were carried in the digestive tract of the mosquito – this matches the 题干.
refused to order- the distribution of- quinine, allowing- the epidemic- to spread (拒绝奎-宁，任由疫情蔓延)	expert' s decision- not to halt- the spread (专家不-阻止传播的决定)	Q23 (F)	Alberto Missiroli- refused to order- the distribution- of quinine, so- allowing the- epidemic to- spread unchecked- – this matches the- 题干.
has contemporary relevance (具有当-代意义)	significance for- today' s readers (-对当今读者的意义)	Q24 (H)	Snowden' s book also has contemporary relevance – this matches the 题干.
miasma theory- , malaria- was hereditary (瘴-气理论、疟疾遗传)	false assumptions which held back scientific understanding (阻-碍科学认知的错误假-设)	Q25 (B)	the theory of ' - miasma' ... the- widespread belief- that malaria was- hereditary – these- match the 题干.
introduced a- quinine law (出台-奎宁法律)	reference to legislation (提及立-法)	Q26 (D)	Italy introduced a- quinine law and a- quinine tax in 190- 4 – this matches the- 题干.

说明

1. 上述内容可直接复制至Word文档，通过“字体颜色”功能将标注为红色加粗的证据句/答案句设置为红色加粗，格式清晰适配雅思阅读备考；
2. 高频词汇覆盖“医学术语（quinine, micro-organism）”“历史/社会术语（miasma, hereditary）”“描述性词汇（scourge, integral）”，同义替换精准对应各题型考点，强化“题干-原文”细节匹配思维，助力提升解题效率与医学、历史类词汇储备。
