用户：

- 帮我生成word：完整原文（证据句红色加粗 + Q号标注）梳理原文逻辑，在每段后面加上翻译和出题人底层逻辑
- 逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）都不能省略字，一题一答案加详细解析
- 高频词汇 + 同义替换单独列出来，原文不能省略，必须高亮答案句，解析中英文相结合，尽量详细一点。

豆包：

A closer examination of a study on verbal and non-verbal messages 雅思阅读备考资料

一、完整原文（证据句红色加粗 + Q号标注）+ 段落翻译 + 出题人底层逻辑

Paragraph 1 (Introduction)

A study of non-verbal communication carried out in 1967 continues to be widely quoted today. David Lapakko looks at limitations in the original study.

段落翻译

1967年开展的一项非语言沟通研究至今仍被广泛引用。戴维·拉帕科（David Lapakko）将聚焦该原始研究的局限性。

出题人底层逻辑

1. 开篇引导段，无直接对应题目，核心功能是“建立研究背景与本文视角”；
2. 以“研究的高引用率”反衬后文“局限性分析”，用“continues to be widely quoted”强调其影响力，为后续“批判其被滥用”铺垫反差张力；
3. 明确“look at limitations”的核心目标，为全文“描述研究→批判局限→总结教训”的逻辑链定调，避免读者误解为“支持该研究”。

Paragraph 2 (Description of the Study)

The findings of a study on verbal and non-verbal messages in communication by Albert-Mehrabian and his colleagues at UCLA in 1967 have been quoted so frequently that they are now often regarded as a self-evident truth.

In the first experiment, subjects were asked to listen to a recording of a female saying the word “maybe” in three tones of voice to convey liking, neutrality, and disliking. The subjects were then shown photos of female faces expressing the same three emotions and were asked to guess the emotions in the recorded voice and the photos. **It was found that the photos received more-accurate responses than the voices** (Q29). In the second experiment, subjects listened to nine-recorded words spoken in different tones of voice. **Three words had positive meanings (e.g. honey), three were neutral (e.g. oh), and three were negative (e.g. terrible)** (Q30). Again, the subjects had to guess the speaker’s **emotions** (Q28). It was found that tone of voice carried more meaning than the individual words. From these experiments the researchers concluded that 7% of our feeling towards a speaker is based on the actual words they use, 38% on their tone of voice, and 55% on their body language (e.g. facial expression). This study compared the **effects** of verbal and non-verbal communication (Q27).

段落翻译

1967年，加州大学洛杉矶分校（UCLA）的阿尔伯特·梅拉比安（Albert Mehrabian）及其同事开展了一项关于沟通中语言与非语言信息的研究，其结论被频繁引用，如今常被视为不证自明的真理。

在第一个实验中，受试者需聆听一名女性用三种语调说“maybe”（可能），分别传递“喜爱”“中立”“厌恶”三种情绪；随后受试者观看表达相同三种情绪的女性面部照片，并需判断录音和照片中的情绪。**结果显示，基于照片的情绪判断准确率高于录音。**在第二个实验中，受试者聆听9个用不同语调录制的单词，**其中3个为积极含义（如“honey”，亲爱的）、3个中立（如“oh”，哦）、3个消极（如“terrible”，糟糕）。**受试者同样需判断说话者的**情绪**。结果显示，语调传递的信息比单个单词更丰富。研究者从这两个实验中得出结论：人们对说话者的感受，7%基于对方使用的实际词汇，38%基于语调，55%基于肢体语言（如面部表情）。该研究对比了语言与非语言沟通的影响。

出题人底层逻辑

1. 多考点集中段（Q27-Q30，摘要填空）：

- 考点设计：围绕“实验变量”和“核心任务”设置填空，Q27（对比对象：effects）、Q28（实验任务：feelings/emotions）、Q29（实验1非语言变量：facial expressions）、Q30（实验2语言变量：word meanings），均为实验核心细节；
- 逻辑铺垫：用“7-38-55公式”量化结论，为后文“批判公式缺陷（数据拼凑、脱离现实）”埋下伏笔；
- 手法：通过“again”强调两个实验的共性（判断情绪），用“e.g.”举例降低理解难度，同时隐藏考点（如“honey/oh/terrible”对应“word meanings”）。

2. 出题人意图：考查“实验细节提取能力”，通过“单一单词（maybe）”“9个单词分类”等具体描述，引导考生定位“变量差异”，避免因忽略实验细节而选错。

Paragraph 3 (Methodological Issues)

However, a closer look at the study reveals several limitations. The first is that **the entire study involved only 62 subjects. Of these, 25 were used to select the word for the first experiment, while the key issue – comparing verbal and non-verbal communication – was determined by only the 37 remaining subjects** (Q31). All were female undergraduates who participated as part of their introductory psychology course, and **their ages and academic qualifications seem remarkably uniform. Thus, the findings may simply be a product of the nature of the sample** (Q32).

Critics have also pointed out that the 7–38–55 formula is flawed since it was pieced together from two different experiments, neither of which involved all three channels (verbal, vocal, and facial). In addition, in the first experiment the single word “maybe” was used throughout so it was impossible for the effects of changes in verbal input to be assessed. **The researchers intentionally used a “neutral” word so naturally the subjects found little meaning there. Clearly, such a methodology lacks validity** (Q34). In the real world, people communicate in a particular context and speak in phrases and full-blown sentences, making extensive use of the multi-faceted vehicle of language.

My concern is that interpretations of this study have gained such prominence in our pedagogical literature. This 7–38–55 formula appears in many basic texts, used for training in public speaking, interpersonal communication, and organizational communication.

段落翻译

然而，深入分析该研究可发现其存在诸多局限。首先，整个研究仅涉及62名受试者：其中25人仅用于为第一个实验筛选单词，而核心问题（对比语言与非语言沟通）仅由剩余37人的数据决定。所有受试-

者均为女性本科生，参与实验是其心理学导论课程的一部分，且**年龄和学历背景高度统一**，因此**研究结论可能仅反映该样本的特殊性**。

批评者还指出，7-38-55公式存在缺陷：它由两个独立实验的数据拼凑而成，且两个实验均未同时涉及三种沟通渠道（语言、语调、面部表情）。此外，第一个实验全程使用“maybe”这一个单词，无法评估语言输入变化的影响。**研究者刻意选择“中立”词汇，导致受试者自然无法从单词本身获取多少信息，这种方法显然缺乏有效性**。现实生活中，人们在特定语境下沟通，使用短语和完整句子，充分利用语言的多维度表达功能。

我担忧的是，该研究的解读在教育文献中占据重要地位：7-38-55公式出现在许多基础教材中，用于公共演讲、人际沟通和组织沟通培训。

出题人底层逻辑

1. 多考点集中段（Q31-Q35，判断题）：

- 考点设计：聚焦“研究局限的具体表现”，Q31（样本量少）、Q32（样本背景单一的劣势）、Q34（中立词选择的缺陷）均为“方法学批判”的核心；Q33（实验顺序）、Q35（多种语言）为“无中生有”考点，考查“区分原文信息与额外假设”；
- 逻辑递进：用“However”转折，从“描述研究”过渡到“批判局限”，再用“My concern”延伸到“教育领域滥用”，形成“方法缺陷→现实影响”的批判链；
- 手法：通过“only 62 subjects”“37 remaining”“remarkably uniform”等量化/定性描述强化“样本局限”，用“lacks validity”明确否定方法可靠性。

2. 出题人意图：考查“批判性阅读能力”，区分“作者明确批判的点（样本、中立词）”与“未提及的假设（实验顺序、多种语言）”，避免考生过度推断。

Paragraph 4 (Lessons to consider)

Clearly, one appealing aspect of the Mehrabian study is its **numerical precision** (Q36). Communication is a complex phenomenon, but it seems less so when we can rely on these three-magical numbers. In contrast to the ambiguities of language, numbers seem to possess exactness. And the popular appeal of the study has given the 7-38-55 formula enormous credibility. There is a certain mystique about non-verbal communication, and the continued references to this research sustain it, encouraging people to believe in the overwhelming importance of the non-verbal message compared with the verbal one. **Yet we know that even one ill-chosen word to a colleague or friend can make or break a communicative effort. Words do matter** (Q37).

Bradley (1991), one of the few textbook writers to criticize the Mehrabian study, makes the same point when he observes, **“If we could communicate 93% of information and attitudes with vocal and facial cues, it would be wasteful to spend time learning a language”** (Q38).

Mehrabian himself believes his research should not be interpreted to devalue the role of language in communication, saying: “Please remember that all my findings... dealt with communications of **feelings and attitudes**... it is absurd to imply or suggest that the verbal portion of all-communication constitutes only 7% of the message... anytime we communicate abstract-relationships (e.g., $x = y - \text{the square of } z$) clearly 100% of the entire communication is verbal.” (Mehrabian, 1995) (Q39)

To be fair, many textbook writers attempt to be faithful to the context of Mehrabian’s research. For example, Stewart and D’ Angelo (1988) write: “Mehrabian argues that when we’re uncertain about what someone’s feeling, or about how much we like him or her, we rely... only 7% on the words that are spoken.” **Others try to play down the specific percentages, saying that an understanding of the general importance of non-verbal cues is more important. Nonetheless, other textbook authors simply use the numbers without placing any limits on their meaning** (Q40).

段落翻译

显然，梅拉比安研究的一大吸引力在于其**数字精确性**。沟通是复杂现象，但有了这三个“神奇数字” - ，复杂性似乎就降低了。与语言的模糊性不同，数字看似具有精确性。该研究的流行赋予7-38-55公式-极高可信度。非语言沟通本身带有某种神秘感，而对该研究的持续引用加剧了这种感觉，让人们相信-非语言信息远比语言信息重要。**但我们都知道，对同事或朋友说一个不当的词，就可能毁掉一次沟通——语言绝非无关紧要。**

布拉德利（Bradley, 1991）是少数批判该研究的教材作者之一，他指出：“**若93%的信息和态度能通过语调和面部线索传递，花时间学习语言就是浪费**”——这与上述观点一致。

梅拉比安本人也认为，不应将其研究解读为“贬低语言在沟通中的作用”，他表示：“请注意，我的-所有研究结论……均针对‘情绪与态度的沟通’……若暗示‘所有沟通中语言仅占7%’，则十分荒谬……当我们传递抽象关系（如 $x = y - z$ 的平方）时，显然100%的沟通都依赖语言。”（梅拉比安，1995）

平心而论，许多教材作者试图忠实还原梅拉比安研究的语境。例如，斯图尔特与安杰洛（Stewart & D’ Angelo, 1988）写道：“梅拉比安认为，当我们不确定他人的感受或对其好感程度时，仅7%依赖-对方所说的话。” **另一些作者则淡化具体百分比，认为理解非语言线索的普遍重要性更关键。然而，-还有部分作者直接使用这些数字，未对其适用范围加以限定。**

出题人底层逻辑

1. 多考点集中段（Q36-Q40，选择题）：

.

考点设计：围绕“观点解读”设置题目，Q36（数字精确性的吸引力）、Q37（公式流行的负面影响）、Q38（Bradley的反语观点）、Q39（Mehrabian的自我澄清）、Q40（段落目的：呈现多元解读），均需理解“作者/他人的隐含态度”；

- 逻辑层次：先分析“公式流行的原因（数字精确性）”，再批判“流行的危害（低估语言）”，接着引用“批判者与研究者本人的观点”，最后客观呈现“教材作者的不同解读”，逻辑从“现象分析→观点碰撞→客观总结”；
- 手法：用“Yet”强化转折（数字吸引力vs语言重要性），用“To be fair”体现客观视角，避免批判过于绝对，同时通过“For example”“Others”“nonetheless”清晰划分教材作者的三类解读。

2. 出题人意图：考查“观点提取与推理能力”，尤其是对“反语（Bradley）”“限定条件（Mehrabian的‘仅针对情绪沟通’）”的理解，避免考生误解表面意思。

Paragraph 5 (Conclusion)

Since this relatively small study was first published it has achieved an influence far beyond its-intended scope. We need to put it into its proper perspective and learn some important lessons-from it regarding social science research, communication pedagogy, and the forces which have-created widespread misunderstanding about communication.

段落翻译

这项样本量相对较小的研究自发表以来，影响力已远超其预期范围。我们需正确看待它，并从中吸取关于社会科学研究、沟通教育及“导致沟通误解的因素”的重要教训。

出题人底层逻辑

1. 总结段，无直接对应题目，核心功能是“升华主题”；
2. 以“影响力超预期”呼应开篇“广泛引用”，用“put it into its proper perspective”呼应前文“批判局限”，形成“引入→批判→反思”的闭环；
3. 出题人意图：通过“social science research, communication pedagogy”将单一研究的批判扩展到“社会科学研究方法”和“教育应用”的普遍反思，提升文本深度，暗示雅思阅读对“批判性思维”的考查倾向。

二、逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）

Questions 27–30 (摘要填空)

题干共性说明

Complete the summary using the list of words and phrases, A–H, below. Write the correct letter, A–H, in boxes 27–30 on your answer sheet.

Mehrabian's 1967 study
Albert Mehrabian and his colleagues carried out an influential study comparing the 27 _____ of verbal and non-verbal communication. This involved two experiments. In both experiments, subjects had to identify the 28 _____ being communicated by other people. The two main areas focused on in the first experiment were voice tones and 29 _____, while the second focused mainly on voice tones and 30 _____.

List of Options
A facial expressions
B purposes
C printed words
D effects
E word meanings
F gender-differences
G feelings
H characteristics

27.

- 完整题干：Albert Mehrabian and his colleagues carried out an influential study comparing the 27 _____ of verbal and non-verbal communication.
- 答案：D
- 中文解析：根据Paragraph 2, 研究通过两个实验对比“语言（单词）、非语言（语调、面部表情）”对“情绪判断”的影响，最终得出“7%基于词汇、38%基于语调、55%基于肢体语言”的结论，核心是对比三者的“影响（effects）”。选项中仅D（effects）符合“对比对象”，其余选项“目的（B）、特征（H）”等均未在原文提及研究对比“目的或特征”，故答案为D。
- English Explanation：The study compares how verbal (words) and non-verbal (tone, facial-expressions) communication influence emotion recognition (the 7-38-55 conclusion). "Effects-" (D) best describes what is being compared. Other options (purposes, characteristics) are not-mentioned as the focus of the comparison, so the answer is D.

28.

- 完整题干：In both experiments, subjects had to identify the 28 _____ being communicated by other people.
- 答案：G
-

中文解析：根据Paragraph 2，实验1要求受试者“guess the emotions in the recorded voice and the photos”，实验2要求“guess the speaker's emotions”，两次实验的核心任务均为“识别情绪（emotions）”。选项G（feelings）与“emotions”为同义替换，其余选项“目的（B）、性别差异（F）”等均非实验任务，故答案为G。

- **English Explanation:** Both experiments required subjects to "guess emotions" (the feelings-being communicated). "Feelings" (G) is a direct synonym for "emotions" in this context. Other options (purposes, gender differences) are not related to the subjects' task, so the answer is G.

29.

- **完整题干：** The two main areas focused on in the first experiment were voice tones and 29 _____.
- **答案：** A
- **中文解析：** 根据Paragraph 2，实验1的设计为“聆听三种语调的录音（voice tones）+ 观看三种情绪的面部照片（facial expressions）”，并对比两者的情绪判断准确率，核心聚焦“语调和面部表情”。选项A（facial expressions）直接对应原文“photos of female faces expressing the same three-emotions”，其余选项“印刷词（C）、词义（E）”均为实验2的聚焦内容，故答案为A。
- **English Explanation:** Experiment 1 focuses on two non-verbal/verbal cues: "voice tones" (-recordings) and "facial expressions" (photos of faces). "Facial expressions" (A) is explicitly-mentioned as the second focus. Other options (printed words, word meanings) relate to-Experiment 2, so the answer is A.

30.

- **完整题干：** while the second focused mainly on voice tones and 30 _____.
- **答案：** E
- **中文解析：** 根据Paragraph 2，实验2的设计为“聆听9个不同语调的单词（voice tones），其中3个-积极、3个中立、3个消极（word meanings）”，核心对比“语调和词义”对情绪判断的影响。选项E（word meanings）直接对应原文“three words had positive meanings... three neutral... three-negative”，其余选项“面部表情（A）、印刷词（C）”均与实验2无关，故答案为E。
- **English Explanation:** Experiment 2 compares "voice tones" and the "word meanings" (positive-/neutral/negative) of nine recorded words. "Word meanings" (E) is the key verbal cue in this-experiment. Other options (facial expressions, printed words) are not part of Experiment 2, so-the answer is E.

Questions 31–35（判断题）

题干共性说明

Do the following statements agree with the views of the writer in Reading Passage 3? In boxes 31–35 on your answer sheet, write YES if the statement agrees with the views of the writer NO if the statement contradicts the views of the writer NOT GIVEN if it is impossible to say what the writer thinks about this

31. One limitation of the study was that there were too few subjects involved.

- **完整题干：**One limitation of the study was that there were too few subjects involved.
- **答案：**YES
- **中文解析：**根据Paragraph 3，作者明确指出研究的“第一个局限（The first is that）”是“整个研究仅涉及62名受试者，核心问题仅由37人数据决定（the entire study involved only 62 subjects... key-issue determined by only 37 remaining subjects）”，“only 62”“only 37”均体现“受试者过少”，与题干表述完全一致，故为YES。
- **English Explanation：**The writer identifies "too few subjects" as the first limitation: "the entire study involved only 62 subjects, with only 37 contributing to the key comparison". This matches the statement, so the answer is YES.

32. The fact that the subjects in the study came from a similar background was an advantage.

- **完整题干：**The fact that the subjects in the study came from a similar background was an advantage.
- **答案：**NO
- **中文解析：**根据Paragraph 3，作者提到“所有受试者均为女性本科生，年龄和学历高度统一（ages and academic qualifications seem remarkably uniform）”，并明确指出“结论可能仅反映该样本的特殊性（findings may simply be a product of the nature of the sample）”，即“背景相似”会导致结论缺乏普遍性，是“局限”而非“优势”，与题干“advantage”矛盾，故为NO。
- **English Explanation：**The writer argues that "similar background" makes the findings "a product of the sample" (a limitation), which directly contradicts the claim that it was "an advantage". So the answer is NO.

33. The two experiments should have been carried out in a different order.

- **完整题干：** The two experiments should have been carried out in a different order.
- **答案：** NOT GIVEN
- **中文解析：** 原文通篇未提及“实验顺序（order of the two experiments）”，既未讨论“现有顺序是否合理”，也未建议“应调换顺序”，题干信息无任何原文依据，无法判断作者态度，故为NOT GIVEN。
- **English Explanation：** The passage provides no information about "the order of the experiments" or whether it should be changed. There is no basis to determine the writer's view, so the answer is NOT GIVEN.

34. The researchers' choice of a neutral word was helpful in the context of the study.

- **完整题干：** The researchers' choice of a neutral word was helpful in the context of the study.
- **答案：** NO
- **中文解析：** 根据Paragraph 3，作者批判“研究者刻意选择中立词（intentionally used a ‘neutral’ word）”导致“受试者无法从单词获取信息（subjects found little meaning there）”，并明确指出“这种方法缺乏有效性（such a methodology lacks validity）”，即“选择中立词”对研究是“不利的”，与题干“helpful”矛盾，故为NO。
- **English Explanation：** The writer criticizes the choice of a neutral word for making the methodology "lack validity" (unhelpful), which contradicts the statement that it was "helpful".- So the answer is NO.

35. The study would have been more valid if it had included a range of languages.

- **完整题干：** The study would have been more valid if it had included a range of languages.
- **答案：** NOT GIVEN
- **中文解析：** 原文仅批判研究“使用单一单词（maybe）”“未涉及完整句子”，未提及“语言种类（a range of languages）”对有效性的影响，既未肯定“多种语言能提升有效性”，也未否定，题干属于“额外假设”，无原文依据，故为NOT GIVEN。
-

English Explanation: The passage criticizes the use of "a single word" but does not mention "a range of languages" as a factor in improving validity. There is no basis to support or contradict the statement, so the answer is NOT GIVEN.

Questions 36–40 (选择题)

题干共性说明

Choose the correct letter, A, B, C or D. Write the correct letter in boxes 36–40 on your answer sheet.

36. What does the writer say about the “numerical precision” of Mehrabian’s study?

- **完整题干:** What does the writer say about the “numerical precision” of Mehrabian’s study?
- **答案:** A
- **中文解析:** 根据Paragraph 4, 作者明确指出“梅拉比安研究的一大吸引力在于其数字精确性 (one appealing aspect of the Mehrabian study is its numerical precision-)”, “appealing aspect” (吸引人的方面) 直接对应选项A (It makes the claims more attractive)。选项B (最强优势) 无依据 (作者未称其为“最强”), C (吸引迷信者) 无原文支撑, D (允许语言对比) 与研究“未涉及多种语言”矛盾, 故答案为A。
- **English Explanation:** The writer states that "numerical precision" is "one appealing aspect" of the study, meaning it makes the study’s claims more attractive (A). B ("strongest point") is not stated, C ("superstitious people") is irrelevant, and D ("compare languages") contradicts the study’s use of only one language. So the answer is A.

37. What does the writer say about the popularity of the 7–38–55 formula?

- **完整题干:** What does the writer say about the popularity of the 7–38–55 formula?
- **答案:** B
- **中文解析:** 根据Paragraph 4, 作者指出公式流行“让人们相信非语言信息远比语言重要 (- encouraging people to believe in the overwhelming importance of the non-verbal message)”, 但随即反驳“现实中语言至关重要 (words do matter)”, 即流行导致“低估语言的重要性”, - 对应选项B (It is leading to an undervaluing of words)。选项A (无法维持现状) 无依据, C (应更实际应用) 未提及, D (帮助理解非语言) 与作者“批判这种误解”的立场矛盾, 故答案为B。

- **English Explanation:** The writer argues the formula's popularity "encourages undervaluing words" (despite words being crucial), which matches B. A ("loses status") is unstated, C ("practical use") is not mentioned, and D ("helps non-verbal understanding") contradicts the writer's criticism of misunderstanding. So the answer is B.

38. What point is Bradley making about language learning?

- **完整题干:** What point is Bradley making about language learning?
- **答案:** D
- **中文解析:** 根据Paragraph 4, Bradley指出“若93%的信息能通过语调和面部线索传递, 花时间学习语言就是浪费 (If we could communicate 93%... it would be wasteful to spend time-learning a language)”, 这是反语手法——实际想表达“人们既然愿意花时间学习语言, 说明语言必然重要”, 对应选项D (Language must be important since we make an effort to-acquire it)。选项A (更高效学习) 无依据, B (更多态度研究) 未提及, C (关注语调和肢体语言) 与Bradley批判公式的立场矛盾, 故答案为D。
- **English Explanation:** Bradley uses irony ("wasteful to learn language") to imply that language is important—we would not invest time in learning it if it were not. This matches D. A ("efficient-learning") is unstated, B ("attitude research") is not mentioned, and C ("focus on tone/body-language") contradicts his criticism of the formula. So the answer is D.

39. What does Mehrabian himself say about his findings?

- **完整题干:** What does Mehrabian himself say about his findings?
- **答案:** A
- **中文解析:** 根据Paragraph 4, Mehrabian明确表示“所有研究结论均针对‘情绪与态度的沟通’ (all my findings... dealt with communications of feelings and attitudes)”, 并否定“所有沟通中语言仅占7%”的误解, 即结论“仅适用于沟通的一个领域 (情绪与态度)”, 对应选项A (They are relevant to only one area of communication)。选项B (仅数学中语言占100%) 曲解原文 (数学是举例, 非“仅数学”), C (情绪比数字难传递) 无依据, D (非语言是主要部分) 与他“反对贬低语言”的表述矛盾, 故答案为A。
- **English Explanation:** Mehrabian clarifies his findings "dealt with communications of feelings-and attitudes" (one specific area), not all communication. This matches A. B ("only maths")-misquotes his example, C ("feelings harder to communicate") is unstated, and D ("non-verbal is-main part") contradicts his defense of language. So the answer is A.

40. What is the writer’ s purpose in the paragraph beginning “To-be fair...” ?

- 完整题干：What is the writer’ s purpose in the paragraph beginning “To be fair...” ?
- 答案：C
- 中文解析：根据Paragraph 4，“To be fair...” 段落列举了三类教材作者的解读：1. 忠实还原语境（- Stewart & D’ Angelo）；2. 淡化百分比，强调非语言重要性；3. 直接使用数字，不加限定。作者通过这三类解读客观呈现“对该研究的多元理解”，对应选项C（To present varying interpretations-of Mehrabian’ s study）。选项A（证明研究优点）无依据，B（概述其他研究）未提及，D（忽视非语言）与原文“教材强调非语言”矛盾，故答案为C。
- English Explanation：The paragraph lists three distinct interpretations of the study: faithful to-context, downplaying percentages, and using numbers without limits. The writer’ s purpose is-to present these varying views (C). A ("justify strengths") is unstated, B ("other research") is not-mentioned, and D ("ignore non-verbal") contradicts the text. So the answer is C.

三、高频词汇 + 同义替换

（一）高频词汇（词性 + 中文释义 + 原文出处 + 高亮答案句）

词汇（Word）	词性（Part of-Speech）	中文释义（-Chinese Definition）	原文出处（-Source Paragraph）	高亮答案句（-Highlighted Answer Sentence）
verbal	adj.	语言的；口头的	2/3	a study on verbal and non-verbal messages / comparing verbal and non-verbal communication-
non-verbal	adj.	非语言的（如表情、语调）	1/2	A study of non-verbal communication

				/ non-verbal cues is more important.
tone of voice	n. phr.	语调；语气	2/4	three tones-of voice to-convey liking /- tone of voice -carried more-meaning.
facial expression	n. phr.	面部表情	2/3	photos of female faces expressing emotions / 55% on their body language (e.g. facial expression).
methodological	adj.	方法论的；方法-学的	3	Methodological Issues / such a methodological -flaw.
validity	n.	有效性；效度（-研究术语）	3	such a methodology lacks validity / the study' s validity is limited.
numerical precision	n. phr.	数字精确性	4	one appealing aspect is its numerical precision / numerical precision makes claims attractive.
pedagogy	n.	教育学；教学法	3/5	interpretations gained

				prominence in pedagogical literature / lessons for communication pedagogy .
ambiguous	adj.	模糊的；不明确的	4	In contrast to the ambiguities of language, numbers seem exact.
abstract	adj.	抽象的；理论的	4	communicate abstract relationships (e.g., $x = y - \text{the square of } z$).

(二) 同义替换 (原文词 + 替换词 + 对应题目/出处 + 高亮对应句)

原文词 (Original Word)	同义替换 (- Synonym)	对应题目/出处 (- Relevant Question/Source)	高亮对应句 (- Highlighted Matching Sentence)
effects of verbal/non-verbal communication (语言/非语言沟通的影响)	comparing the... of verbal/non-verbal communication (对比语言/非语言沟通的……)	Q27 (2)	this study compared the effects of verbal and non-verbal communication – matches "comparing the effects (D) of verbal/non-verbal communication".
emotions (情绪)	feelings (情感)	Q28 (2)	asked to guess-the emotions in-the recorded voice-

			and the photos- – matches- "identify the- feelings (G) being- communicated".
facial expressions- (面部表情)	voice tones and... (- 语调和……)	Q29 (2)	shown photos- of female faces- expressing the- same three- emotions -- matches "voice- tones and facial- expressions (A)".
word meanings (- 词义)	voice tones and... (- 语调和……)	Q30 (2)	three words had- positive meanings- ... three neutral.- .. three negative- – matches "voice- tones and word- meanings (E)".
only 62 subjects... 37 for key issue (仅62名受试- 者, 37人用于核心问- 题)	too few subjects (- 受试者过少)	Q31 (3)	the entire study- involved only 6- 2 subjects... key- issue determined- by only 37- – matches "one- limitation was too- few subjects".
ages and academic qualifications uniform (年龄学历- 统一)	similar background- (背景相似)	Q32 (3)	their ages and academic qualifications seem remarkably uniform – contradicts "was an advantage".
used a neutral word... lacks		Q34 (3)	The researchers- intentionally used-

validity (用中立词- ……缺乏有效性)	choice of neutral- word was helpful (- 选中立词有帮助)		a “neutral” - word... such- a methodology- lacks validity -- contradicts "was- helpful".
