

DOLL

A doll is a model typically of a human or humanoid character, often used as a toy for children. Dolls have also been used in traditional religious rituals throughout the world. Traditional dolls made of materials such as clay and wood are found in the Americas, Asia, Africa and Europe. The earliest documented dolls go back to the ancient civilizations of Egypt, Greece, and Rome. They have been made as crude, rudimentary playthings as well as elaborate art. Modern doll manufacturing has its roots in Germany, from the 15th century. With industrialization and new materials such as porcelain and plastic, dolls were increasingly mass-produced. During the 20th century, dolls became increasingly popular as collectibles.

Dolls have told the story of humanity since the dawn of time. Early dolls were probably religious figures and were made from clay, bone, stone, fur, or wood. The earliest rag doll we know of came from Egypt, and is over 2000 years old. she now lives in The British Museum. Dolls that have survived from the Stone Age are the oldest we know of; these are the Venus or Goddess figures, and date between 20,000 and 40,000 years old. From Babylon comes a fragment of an alabaster doll with movable arms. Other ancient dolls come from Egypt, Rome, Greece, and Asia. Wooden paddle dolls painted with various designs and with "hair" made of strings of clay or wooden beads, come from Egyptian graves dating back to 2000 BC. It used to be taken for granted that these were dolls. The designs and hieroglyphics on them have made some archaeologists think again.

My theory is that the messages on the doll may have been educational, something like our modern board books, or the colonial hornbooks that taught children. Egyptian tombs of wealthy families have included pottery dolls and the aforementioned rag doll, as well as dolls of bone. Ushabti abound in tombs, and some of these are made of precious metals. Some dolls placed in graves may have been favorite possessions, but others are talismans, or like the Ushabti, they took the place of human beings once sacrificed and buried with the royal personage to serve him/her in the next world. The little doll figures took the humans' places, and were said to rise in The Afterworld to serve their masters.

The same theory is behind the life sized soldiers in the Chinese emperor's tomb. Dolls have been found by archeologists buried in Greek and Roman children's graves. Girls from Greece and Rome dedicated their wooden dolls to goddesses like Diana after when they were to be married. Sappho, the great poet, left a fragment of verse where she dedicated her doll to Aphrodite, and asked the Goddess not to despise her doll's little purple kerchief.

In the Middle Ages and after, Europe was the hub for doll manufacturing. There are woodcuts dating from the late 1400s that show Dollmakers at work. . Primarily made of wood, often with no legs, these stump dolls from 16th and 17th century England are few in number today. In her books, Antonia Fraser shows one that belonged to Alycia Boleyn, niece of Anne Boleyn, tragic second queen of Henry VIII and mother of Elizabeth I. She shows another wooden doll dating from the late 16th century that is all carved. Germany produced many peg wooden dolls, and wooden dolls elaborately dressed were made for the 17th English Bartholomew Faire and were called Bartholomew Babies.

English Queen Anne and Georgian dolls were made during the late and very early 19th centuries. By the 1800s, composition , a mixture of pulped wood or paper and glue was used to make doll heads and bodies. A variation of this is papier mache, that uses more shredded paper than sawdust. Molded under pressure, composition cracked, and papier mache could be crushed, but the dolls created were durable dolls that could be mass produced. Wax dolls were popular in the 17th and 18th centuries, maybe because waxwork attractions like those of Mme. Tussaud were wildly popular, too. Germany was a major manufacturing center for wax dolls, but so was The Netherlands. Some of the most distinctive wax dolls were created in England between 1850 and 1930 by families that came from Mexico and Italy.

A famous female anatomist and sculptor named Morendi was making lifelike models for anatomical study during this time. In skill, she rivaled Mme. Tussaud herself. One of the first baby dolls was made of wax, as were many Santos and church figures. I have one of these 18th century wax dolls in my collection. Porcelain clay was used to make dolls by around 1840, though glazed china or porcelain figurines date to the 17th century. Some of these are made of glazed terracotta clay, not white kaolin porcelain. True white porcelain dates to Ancient China and Japan, though it was not always used for dolls or figurines. The oldest ceramic figure in existence is a Czech Venus figure from about 25,000 B.C. became popular at the beginning of the 19th century. China is glazed, but bisque is unglazed. Germany, France, and Denmark made china heads for dolls in the 1840s. There may have been one billion of them made in Germany alone. French and German bisque dolls were popular during the 19th and early 20th century. Bisque collectors dolls, both artist and reproduction, have enjoyed a Renaissance since the 1940s. They were very plentiful during the late 80s and 90s. The French "bebe" was popular in the 1880s. French Fashion dolls representing adult women were popular between about 1850 and 1880. German bisque dolls became popular, though German companies first made heads and parts for French manufacturers. Some were not as expensive as German dolls, but some German dolls were made for the French market.

Kamner & Reinhardt made one of the first bisque character doll in the 1900s, starting a trend of creating realistic dolls. Rag and cloth dolls were often made at home, and have survived since 2000 B.C., though more dolls made of cloth, fur, and skin probably existed, but did not survive in damp climates. After the Civil War in the 1860, American doll makers began to create, including Izannah Walker, Greiner, Arnold Print Works, Franklin Darrow, Joel Ellis, and others.. Celluloid was actually invented in New Jersey in the late 1860s and was used to manufacture dolls until the mid-1950s and later. Some celluloid dolls are reproduced today by Petitcolin in France. German, French, American, and Japanese factories made them. After World War II, hard plastic dolls, then vinyl dolls, were manufactured. In the early 1970s, Pat Smith wrote the first of her series of books on Modern Dolls, and many vinyl and hard plastic dolls became as popular as many antiques, especially those by Madame Alexander and Vogue. Paper dolls have existed since ancient times, as have puppets and some automata. Folk dolls have always represented the arts of those who made them, and costume dolls often show us how lost civilizations dressed. Today, there are virtual dolls, paper dolls, computer shipped animatronic dolls, foreign dolls, animals dolls, you name it. Collectors for all of these and more abound, and the love affair continues.

Foar centuries, rags dolls were made by mothers for their children. These dolls were made with ny fabric (linen or cotton). Available for trade, rag dolls were introduced in the 1850s by English and American manufacturers. Although they were not as sophisticated as dolls created with more noble materials, these dolls were beloved toys for children.

Manufacturing of dolls has become an industry in the United States after the civil war in the 1860s. Doll production was concentrated in New England, with dolls made of various materials such as leather, rubber, paper maché and cloth. Celluloid was developed in New Jersey at the end of the 1860s and was used to manufacture dolls until the middle of the 1950s. The Germans, the French, the Americans and the Japanese directed and administered factories cheaply to produce dolls made out of celluloid in large quantities. However, celluloid fell out of favor because of its extreme flammability and propensity to fade in bright light.

After the second world war, dolls manufacturers experimented with plastic. Hard plastic dolls were manufactured in the 1940s. They resembled composition dolls, but were much more durable. Other materials used during the 1950s and 1960s was rubber (foam rubber and vinyl). Vinyl allowed manufacturers to make doll heads with hair on them, rather than wigs or implanted hair. Nowadays, although the majority of dolls

are produced in large series (mass production), many manufacturers employ traditional materials from the past to make doll collections.

No dolls have been found in prehistoric graves, probably because they were made of such perishable materials as wood and fur or cloth, but a fragment of a Babylonian alabaster doll with movable arms has been recovered. Dolls dating from 3000–2000 bc, carved of flat pieces of wood, geometrically painted, with long, flowing hair made of strings of clay or wood beads, have been found in some Egyptian graves.

Some ancient dolls may have had religious meaning, and some authorities often argue that the religious doll preceded the toy. In ancient Greece and Rome, marriageable girls consecrated their discarded dolls to goddesses. Dolls were buried in children's graves in Egypt, Greece, and Rome and in early Christian catacombs. Ancient rag, or stuffed, dolls have been found, as well as dolls crocheted of bright wool and others with woolen heads, clothed in coloured wool frocks.

As early as 1413 there were Dochenmacher, or doll makers, in Nürnberg, Germany, which, from the 16th to the 18th century, was the leading manufacturer of dolls and toys. Paris was another early mass-producer of doll, making chiefly fashion dolls. Doll's houses were also popular in Europe from the 16th century.

Doll heads were made of wood, terra-cotta, alabaster, and wax—the last a technique perfected in England by Augusta Montanari and her son Richard (c. 1850 – 87), who popularized infant dolls.

About 1820, glazed porcelain (Dresden) doll heads and unglazed bisque (ceramic) heads became popular. A French bisque doll made by the Jumeau family in the 1860s had a swivel neck; the body was made of kid-covered wood or wire or of kid stuffed with sawdust, a type of manufacture that remained common until it was supplanted by molded plastics in the 20th century. Socket joints, movable eyes, dolls with voices, and walking dolls were introduced in the 19th century, as were paper-doll books and dolls of India rubber or gutta-percha. The period from 1860 to 1890 was the golden age of the elaborately dressed Parisian bisque fashion dolls and the smaller “milliner's models.”

The oldest American dolls may be those found in Inca and Aztec graves, such as those near the pyramids of Teotihuacán. Colonial dolls mostly followed European models. Among American Indian dolls, the kachina doll of the Pueblo Indians is noteworthy.

In Japan, dolls are more often festival figures than playthings. At the girls' festival held in March, dolls representing the emperor, empress, and their court are displayed; girls from 7 to 17 visit each other's collections, and refreshments are offered: first, to their majesties, then to the guests, in a ritual more than 900 years old. Japanese boys also have an annual doll festival, from the first May after they are born until they are about 15 years old. Warrior dolls, weapons, banners, and legendary-figure groups are displayed to encourage chivalrous virtues.

In India, elaborately dressed dolls were given to child brides by both Hindus and Muslims. In Syria, girls of marriageable age hang dolls in their windows. In South Africa, among the Mfengu people, every grown girl is given a doll to keep for her first child; on its birth, the mother receives a second doll to keep for the second child.

In the 20th century, notably popular dolls included the teddy bear (1903); the Kewpie Doll (1903); the Bye-lo Baby, who closed her eyes in sleep (1922); the Dydee and Wetsy Betsy dolls (1937); the Barbie doll (1959); Cabbage Patch Kids (1983); and the American Girls Collection (1986)

全文翻译（附重点词汇标注）

玩偶 (Doll)

玩偶是一种通常模仿人类或类人角色的模型，常被用作儿童的**玩具 (toy)**。玩偶在世界各地的传统**宗教仪式 (religious rituals)** 中也被使用。在美洲、亚洲、非洲和欧洲都发现了由**黏土 (clay)** 和**木材 (wood)** 等材料制成的传统玩偶。最早有文献记载的玩偶可以追溯到古埃及、希腊和罗马文明。它们既被制成粗糙、基本的**玩物 (playthings)**，也被制成精美的**艺术品 (art)**。现代玩偶制造业起源于15世纪的德国。随着**工业化 (industrialization)** 和** porcelain (陶瓷)、塑料 (plastic)** 等新材料的出现，玩偶开始被**大规模生产 (mass-produced)**。在20世纪，玩偶作为**收藏品 (collectibles)** 越来越受欢迎。

自古以来，玩偶就一直在讲述人类的故事。早期的玩偶可能是**宗教人物 (religious figures)**，由黏土、骨头、石头、皮毛或木材制成。我们所知最早的**布娃娃 (rag doll)** 来自埃及，已有超过2000年的历史，她现存于**大英博物馆 (The British Museum)**。从石器时代幸存下来的玩偶是我们所知最古老的玩偶；这些是**维纳斯或女神雕像 (Venus or Goddess figures)**，其历史可以追溯到20,000至40,000年前。来自巴比伦的碎片是一个带有**可活动手臂 (movable arms)** 的**雪花石膏 (alabaster)** 玩偶。其他古代玩偶来自埃及、罗马、希腊和亚洲。带有各种图案绘画、以一串串黏土或木珠作“头发”的**木质桨形玩偶 (Wooden paddle dolls)** 来自公元前2000年的埃及墓葬。人们过去曾想当然地认为这些是玩偶。但上面的图案和**象形文字 (hieroglyphics)** 让一些考古学家重新思考。

我的理论是，玩偶上的信息可能具有**教育意义 (educational)**，有点像我们现代的**纸板书 (board books)**，或教导儿童的殖民时期**角帖书 (hornbooks)**。埃及富裕家庭的墓葬中包含了**陶制玩偶 (pottery dolls)**、上述的布娃娃以及**骨制玩偶 (bone)**。**沙伯提 (Ushabti)**（古埃及墓葬中的陪葬俑）在墓葬中很常见，其中一些由**贵金属 (precious metals)** 制成。一些放入坟墓的玩偶可能是**心爱之物 (favorite possessions)**，但其他则是**护身符 (talismans)**，或者像沙伯提一样，它们取代了曾经被**献祭 (sacrificed)** 并与皇室成员一同埋葬以在**来世 (next world)** 侍奉他/她的活人。这些小玩偶形象取代了人的位置，并据说会在**死后世界 (The Afterworld)** 复活来侍奉他们的主人。

中国皇帝陵墓中的**真人大小 (life sized)** 的士兵（兵马俑）背后也有着相同的理论。考古学家曾在希腊和罗马儿童的坟墓中发现埋藏的玩偶。希腊和罗马的女孩在即将结婚时，会将她们的木制玩偶**献给 (dedicated)** 像**戴安娜 (Diana)** 这样的女神。伟大的诗人**萨福 (Sappho)** 留下了一段诗篇碎片，其中她将她的玩偶献给了**阿佛洛狄忒 (Aphrodite)**，并请求女神不要蔑视她玩偶的小**紫色头巾 (purple kerchief)**。

在中世纪及之后，欧洲是玩偶制造业的**中心 (hub)**。有一些可追溯到15世纪末的**木版画 (woodcuts)** 展示了玩偶制作匠在工作。这些主要用木材制成、通常没有腿的**树桩玩偶 (stump dolls)** 来自16和17世纪的英格兰，如今已为数不多。在其著作中，**安东尼娅·弗雷泽 (Antonia Fraser)** 展示了一个属于**艾丽西亚·博林 (Alycia Boleyn)**（**安妮·**

博林 (Anne Boleyn) 的侄女, 安妮是亨利八世悲剧的第二任王后, 伊丽莎白一世 (Elizabeth I) 的母亲) 的玩偶。她还展示了另一个可追溯到16世纪末的全雕刻的 (all carved) 木制玩偶。德国生产了许多木钉玩偶 (peg wooden dolls), 而为17世纪英国巴塞洛缪集市 (Bartholomew Faire) 制作的精美着装木制玩偶被称为巴塞洛缪宝宝 (Bartholomew Babies)。

英国的安妮女王 (Queen Anne) 和乔治王朝 (Georgian) 时期的玩偶制作于18世纪末和19世纪初期。到了19世纪, 合成材料 (composition) (一种纸浆木 (pulped wood) 或纸与胶水的混合物) 被用来制作玩偶的头和身体。其一种变体是纸浆黏土 (papier mache), 它使用的碎纸 (shredded paper) 比锯末多。在压力下模塑成型 (Molded under pressure) 的合成材料会开裂, 纸浆黏土可能被压碎, 但所创造的玩偶是耐用且可大规模生产的。蜡制玩偶 (Wax dolls) 在17和18世纪很流行, 也许是因为像杜莎夫人 (Mme. Tussaud) 那样的蜡像展览也非常受欢迎。德国是蜡制玩偶的主要制造中心, 荷兰也是。一些最具特色的蜡制玩偶是1850年至1930年间在英格兰由来自墨西哥和意大利的家庭制作的。

一位名叫莫伦迪 (Morendi) 的著名女性解剖学家 (anatomist) 和雕塑家 (sculptor) 在此期间制作逼真的 (lifelike) 模型用于解剖学研究。在技艺上, 她可与杜莎夫人本人相媲美 (rivalled)。最早的娃娃玩偶 (baby dolls) 之一是由蜡制成的, 许多桑托斯 (Santos) (宗教圣像) 和教堂人物也是如此。我的收藏中有一个这样的18世纪蜡制玩偶。大约在1840年, 瓷土 (Porcelain clay) 被用来制作玩偶, 尽管上釉瓷器 (glazed china) 或陶瓷小雕像 (porcelain figurines) 可追溯到17世纪。其中一些是由上釉赤陶 (glazed terracotta) 制成的, 而非白瓷 (white kaolin porcelain)。真正的白瓷起源于古代中国和日本, 尽管它并不总是用于制作玩偶或小雕像。现存最古老的陶瓷雕像 (ceramic figure) 是约公元前25,000年的捷克维纳斯雕像。瓷头 (China) (上釉的) 玩偶在19世纪初开始流行。瓷坯 (bisque) (素瓷, 未上釉的 unglazed) 玩偶也是如此。德国、法国和丹麦在19世纪40年代制造了玩偶的瓷头。仅德国可能就生产了十亿个。法国和德国的素瓷玩偶在19世纪和20世纪30年代早期很受欢迎。自20世纪40年代以来, 无论是艺术家作品还是复制品, 素瓷收藏玩偶都经历了一次复兴 (Renaissance)。它们在80年代末和90年代非常丰富。法国的“bebe” (婴儿) 玩偶在19世纪80年代很受欢迎。代表成年女性的法国时装玩偶 (Fashion dolls) 在大约1850年至1880年间很受欢迎。德国素瓷玩偶变得流行起来, 尽管德国公司最初为法国制造商生产头部和部件。有些不像德国玩偶那么贵, 但有些德国玩偶是为法国市场制造的。

卡默和莱因哈特 (Kamner & Reinhardt) 在1900年代制造了第一批素瓷角色玩偶 (character doll) 之一, 开创了制作逼真玩偶 (realistic dolls) 的趋势。布娃娃通常在家里制作, 自公元前2000年就已存在, 尽管可能有过更多由布、毛皮和皮肤制成的玩偶, 但在潮湿气候中没有保存下来。在19世纪60年代内战 (Civil War) 之后, 美国玩偶制造商开始创作, 包括伊赞娜·沃克 (Izannah Walker)、格里纳 (Greiner)、阿诺德印花工厂 (Arnold Print Works)、富兰克林·达罗 (Franklin Darrow)、乔尔·埃利斯 (Joel Ellis) 等。赛璐珞 (Celluloid) 实际上于19世纪60年代末在新泽西发明, 并一直用于制造玩偶直到20世纪50年代中期及以后。一些赛璐珞玩偶如今由法国的

Petitcolin 复刻。德国、法国、美国和日本的工厂都生产过它们。二战后，**硬塑料** (hard plastic) 玩偶，然后是**乙烯基** (vinyl) 玩偶被制造出来。在20世纪70年代初，**帕特·史密斯** (Pat Smith) 写了她关于现代玩偶系列书籍的第一本，许多乙烯基和硬塑料玩偶变得和许多**古董** (antiques) 一样受欢迎，尤其是**亚历山大夫人** (Madame Alexander) 和**沃格** (Vogue) 生产的玩偶。**纸娃娃** (Paper dolls) 自古就存在，**木偶** (puppets) 和某些**自动机械玩偶** (automata) 也是如此。**民间玩偶** (Folk dolls) 一直代表着制作者的艺术，**服装玩偶** (costume dolls) 常常向我们展示失落的文明如何穿着。如今，有**虚拟玩偶** (virtual dolls)、纸娃娃、电脑控制的**电动玩偶** (animatronic dolls)、外国玩偶、动物玩偶，应有尽有。所有这些及更多的收藏者比比皆是，这种**喜爱之情** (love affair) 仍在继续。

几个世纪以来，布娃娃是由母亲们为她们的孩子制作的。这些玩偶是用任何**布料** (fabric) (**亚麻布** linen 或**棉布** cotton) 制成的。可用于贸易的布娃娃在19世纪50年代由英国和美国的制造商推出。尽管它们不像用更贵重材料制成的玩偶那样**精致** (sophisticated)，但这些玩偶是孩子们心爱的玩具。

在19世纪60年代内战之后，玩偶制造业在美国成为一个**产业** (industry)。玩偶生产集中在**新英格兰**，玩偶由各种材料制成，如**皮革** (leather)、**橡胶** (rubber)、**纸浆黏土** (paper maché) 和布。**赛璐珞**于19世纪60年代末在**新泽西**开发出来，并一直用于制造玩偶直到20世纪50年代中期。德国人、法国人、美国人和日本人指导和管理工厂，以低成本大量生产**赛璐珞**玩偶。然而，**赛璐珞**因其**极度易燃性** (extreme flammability) 和在强光下容易**褪色** (fade) 的**倾向** (propensity) 而失宠。

二战后，玩偶制造商开始试验**塑料** (plastic)。硬塑料玩偶在20世纪40年代被制造出来。它们类似于合成材料玩偶，但**耐用得多** (much more durable)。20世纪50年代和60年代使用的其他材料是**橡胶** (**泡沫橡胶** foam rubber 和**乙烯基**)。乙烯基使制造商能够制作**本身带头发** (with hair on them) 的玩偶头，而不是**假发** (wigs) 或**植入的头发** (implanted hair)。如今，尽管大多数玩偶是**大批量生产** (mass production) 的，但许多制造商采用过去的传统材料来制作玩偶**收藏品** (collections)。

在**史前墓葬** (prehistoric graves) 中未发现玩偶，可能是因为它们是由木头、毛皮或布等**易腐烂的材料** (perishable materials) 制成的，但已发现一个带有可活动手臂的**巴比伦雪花石膏**玩偶的碎片。在一些埃及墓葬中发现了可追溯到公元前3000-2000年的玩偶，由扁平木片雕刻而成，几何图案绘画，并有由一串串黏土或木珠制成的飘逸长发。

一些古代玩偶可能具有宗教意义，一些权威人士常常认为宗教玩偶先于玩具出现。在古希腊和罗马，达到婚龄的女孩将她们丢弃的玩偶**奉献给** (consecrated) 女神。玩偶被埋在埃及、希腊和罗马的儿童坟墓以及早期基督教的**地下墓穴** (catacombs) 中。已发现古代的布或**填充玩偶** (stuffed dolls)，以及用**鲜亮羊毛** (bright wool) 钩编的 (crocheted) 玩偶和其他带有**羊毛头** (woolen heads)、穿着彩色羊毛**外衣** (frocks) 的玩偶。

早在1413年，德国**纽伦堡（Nürnberg）**就有玩偶制作匠（Dochenschmayer），从16世纪到18世纪，这里是玩偶和玩具的主要制造商。巴黎是另一个早期大规模生产玩偶的地方，主要制作时装玩偶。从16世纪起，**玩偶之家（Doll's houses）**在欧洲也很流行。

玩偶头由木头、赤陶、雪花石膏和蜡制成——最后一种技术由**奥古斯塔·蒙塔纳里（Augusta Montanari）**和她的儿子**理查德（Richard）**（约1850-87年）在英国完善，他们推广了**婴儿玩偶（infant dolls）**。

大约1820年，**上釉陶瓷（glazed porcelain）**（德累斯顿）玩偶头和**未上釉的素瓷（unglazed bisque）**（陶瓷）头变得流行。19世纪60年代由**朱莫（Jumeau）**家族制作的法国素瓷玩偶有一个**旋转颈（swivel neck）**；身体由**小羊皮覆盖的木头（kid-covered wood）**或金属丝制成，或由填充锯末的小羊皮制成，这种制造类型一直很常见，直到20世纪被**模塑塑料（molded plastics）**取代。**球窝关节（Socket joints）、可动的眼睛（movable eyes）、会发声的玩偶（dolls with voices）**和**行走玩偶（walking dolls）**于19世纪推出，**纸娃娃书（paper-doll books）**和**印度橡胶（India rubber）**或**古塔胶（gutta-percha）**玩偶也是如此。从1860年到1890年是精美着装的巴黎素瓷时装玩偶和较小的“**女帽匠的模型（‘milliner's models’）**”的**黄金时代（golden age）**。

最古老的美国玩偶可能是在**印加（Inca）**和**阿兹特克（Aztec）**坟墓中发现的那些，例如在**特奥蒂瓦坎（Teotihuacán）**金字塔附近发现的那些。殖民时期的玩偶大多遵循欧洲模式。在美国印第安玩偶中，**普韦布洛印第安人（Pueblo Indians）**的**克奇纳神玩偶（kachina doll）**值得注意。

在日本，玩偶更常是**节日人偶（festival figures）**而非玩具。在三月举行的**女孩节（girls' festival）**上，会展示代表天皇、皇后及其宫廷的玩偶；7至17岁的女孩互相参观对方的收藏，并提供茶点：首先献给陛下，然后献给客人，这是一个有900多年历史的仪式。日本男孩也有一个一年一度的玩偶节，从他们出生后的第一个五月开始，直到他们大约15岁。会展示**武士玩偶（Warrior dolls）、武器、旗帜和传奇人物组（legendary-figure groups）**以鼓励**尚武美德（chivalrous virtues）**。

在印度，印度教徒和穆斯林都会向**童养媳（child brides）**赠送精心打扮的玩偶。在叙利亚，达到婚龄的女孩会将玩偶挂在窗前。在南非的**姆芬古人（Mfengu people）**中，每个成年女孩都会得到一个玩偶，为她的第一个孩子保管；孩子出生时，母亲会收到第二个玩偶，为第二个孩子保管。

在20世纪，特别受欢迎的玩偶包括**泰迪熊（teddy bear）**（1903年）；**丘比娃娃（Kewpie Doll）**（1903年）；**拜艾欧宝宝（Bye-Lo Baby）**（她会在睡觉时闭上眼睛）（1922年）；**戴迪（Dydee）**和**湿贝齐（Wetsy Betsy）**玩偶（1937年）；**芭比娃娃（Barbie doll）**（1959年）；**椰菜娃娃（Cabbage Patch Kids）**（1983年）；以及**美国女孩收藏（American Girls Collection）**（1986年）。
