Part 2

Part 2, you will hear a tour guide explaining key locations in Woodhurst Town Centre. First you have some time to look at questions 11 to 15.

Now listen carefully and answer questions 11 to 15.

Tour Guide: Good afternoon everyone, and welcome to our beautiful Woodhurst Town Centre. My name is Sarah and I'll be your guide today as we explore what makes our town so special for both residents and visitors alike.

Let's begin with some of our most popular establishments, starting with the Riverside Lodge. This luxury accommodation has recently undergone extensive renovations. (11) In addition to their two award-winning restaurants specializing in local cuisine, they've added a full-service spa with massage treatments and a heated indoor swimming pool. Many couples choose this location for weekend getaways because of its romantic atmosphere and scenic views of the Weldon River.

Moving on to the Courtyard, what makes this venue stand out is its combination of modern technology and historic charm. The building itself dates to the 18th century, and (12) they offer six different meeting rooms that can accommodate groups up to 200 people for conference, and the parking is available. While it's perfect for corporate events, I should warn younger travelers that the atmosphere here tends to be quite formal in the evenings.

For budget-conscious visitors, the Willow Hostel provides affordable accommodation. You can get there by going through Main Street in the center of the town. (13) It's popular with young backpackers but can get quite noisy, especially during school holidays when the playground is busy. One thing to note - while it's great for socializing, it's probably not be suitable for the elderly.

Now, let me tell you about some of our dining options. The Olive Tree has long been considered one of our finest restaurants, and they've just welcomed a new chef who previously worked in London. (14) The menu focuses on seasonal ingredients sourced from local farms, and their wine list has received special recognition. While it's particularly popular with couples celebrating special occasions, they've recently introduced more casual dining options in their garden terrace area.

Now, don't miss Riverside Boutique on High Street. This family-run shop has kept prices low for decades and the customers here say that they are quite cheap. (15) It doesn't cost too much money and very worthy. Plus, it's surprisingly quiet even during peak hours – no crowded aisles here.

Before you hear the rest of the talk, you have some time to look at questions 16 to 20.

Now listen and answer questions 16 to 20.

Tour Guide: OK, now, let me guide you through our town center's layout in detail. You can see the map, we are here at the tourist information centre.

Many people ask about how to get to the town hall, the building is quite beautiful and it hosts weekly council meetings and community events. (16) Walk along the Brookside Street to the north, and the Town Hall is just opposite the south entrance of the circle.

Some people may want to see our traditional library – a beautiful red-brick building with large arched windows. (17) To reach there, you walk along Brookside Street again, then turn left at the intersection when it meets Rising Road, you will see the library at the opposite side of the park. Inside, the quiet reading rooms offer stunning views of the park's rose gardens, making it a perfect spot for studying or relaxing.

For those needing public transport, you can go to our bus stations, (18) immediately locate at the junction of Rising Road and Dupont Street, where you'll find the convenient buses. Located on the corner of Rising Road, these modern shelters feature real-time digital timetable screens and comfortable seating. Local buses to nearby villages like Weldon and Elmsworth depart every 30 minutes, while express services to the city run hourly.

If you want to visit our famous botanical garden, (19) you walk along the Dupont Street until you reach the junction of the Rotary Road. The expansive Botanical Garden covers large northern area. Highlights include the tropical greenhouse, a Japanese zen garden, and seasonal flower displays that attract photographers year-round.

(20) The Bank recently relocated between the cup shop and the bike shop on High Street. Its new premises offer extended opening hours. For quick cash withdrawals outside business hours, use the 24-hour ATM, just opposite the supermarket.

OK, we can start from here, and you will...

That's the end of Part 2. You now have half a minute to check your answers to Part2.

Part 2

Part 2, you will hear a woman introducing the art exhibition to the audiences. First you have some time to look at questions 11 to 16.

Now listen carefully and answer questions 11 to 16.

Good morning everyone, and welcome to the 15th Annual International Art Exhibition! I'm Sarah Thompson, your event coordinator, and I'll be guiding you through some essential information to make your visit productive and enjoyable.

First, we're absolutely thrilled to see such a wonderful turnout this year. And **we are delighted to see participants from diverse professional backgrounds, including students, attending our exhibition.** While we can't share exact ticket numbers yet, (11) what's particularly exciting is that we have participants from 15 more countries represented than last year!

Now, regarding our lecture program running across 12 halls today. We strongly advise all attendees to (12) carefully check the schedule and select sessions that fit your personal timetable. You don't need to book ahead, but the best talks get packed fast, so you'll want to map out your day.

For our media representatives, special permissions apply in Lecture Hall A - this is our main keynote venue. Please note that filming and photography during presentations is restricted unless you have prior authorization. (13) But Journalists are permitted to carry out real-time interviews with speakers in the designated media zone.

Some important updates: three sessions have changed locations today. The nanotechnology workshop has moved from Hall F to Hall K, while the renewable energy panel is now in Hall B instead of Hall D. (14) These changes were necessary to accommodate increased attendance numbers for these popular topics.

Oh, and one more important thing... (15) The venue is quite extensive, when moving between sessions, we recommend you make sure to leave plenty of time to your next talk, especially if you need to cross from the east to west wings. Rooms must be vacated quickly for the next group.

Finally, about your participation certificates — please note that we're experiencing equipment problems during this busy period, we won't be able to provide them quickly. (16) So, you may head to the registration desk to get your certificate early on the last day of the event.

Alright, we'll review the exhibition layout shortly. Any questions?

Before you hear the rest of the talk, you have some time to look at questions 17 to 20.

Now listen and answer questions 17 to 20.

Okay everyone, **as you can see here on the floor plan,** we're currently positioned in the main hall of our centre. **The entire exhibition takes place on Level 2 of the gallery wing and we have perfect facilities.**

Now, **if you'd like refreshments,** our café serves excellent coffee and sandwiches – (17) it's conveniently situated at the south of our centre, just next to the silk street lift, at the bottom of the map. You'll spot it right away!

Let's begin with the posters - we're showcasing some truly innovative works by brilliant modern artists. **Since the permanent galleries are under renovation,** we've created a temporary posters

exhibition space – (18) very close to the curving wall, immediately at the west of the toilets.

You can't miss it!

I know many of you are asking about the Project Space lab. You'll often find exhibitors here conducting project discussions and experimental work - it's really the creative hub of our space.

(19) It is located in the northeast corner. The Project Space is easily recognizable by its distinct rectangular shape on our facility maps.

Finally, Oh, I almost forgot to mention - we'll all need to gather first at the meeting point before we begin. That's exceptionally easy to locate, and happens to be one of our gallery's most distinctive architectural features. (20) You'll find the meeting area halfway up to the second floor, between the two spiral staircases – that's where we'll reconvene at 3pm. **Don't confuse this with the lifts on the eastern wall!**

You'll notice washrooms flank both staircases, and digital kiosks near the entrance provide interactive maps should you need orientation later. Ok, Any questions?

That's the end of Part 2. You now have half a minute to check your answers.

Part 2

Part2. You will hear a guide talking about different activities in Tirumala Rin Holiday Park. First, you have some time to look at questions 11 to 16

Now listen carefully and answer questions 11 to 16.

Good afternoon, everyone. Today we're focusing on Lundy Island, a unique destination in the Bristol Channel. Some visitors mistakenly expect colorful **nightlife**, but in reality, we have no streetlights - just incredible starry skies! And while some islands boast **advanced infrastructure**, Lundy relies entirely on solar power, completely off the national grid. (11) **Now, what makes Lundy truly special is that it's in an isolated spot. It's a 2-hour ferry ride from mainland Britain, with no airports or bridges connecting it.**

Regarding ferry tickets, prices vary: it's £40 for **children**, though infants under 5 travel free. **Senior citizens** pay £60, (12) **while standard adult return tickets cost £70.** Do book in advance during peak season!

Our bird population has flourished recently. Some people attribute it to the climate change, but it's not the immediate cause. While **strict hunting bans** have helped somewhat, still, it's not the predominant cause. (13) **The real breakthrough came in 2006 when we eliminated invasive rats.** Since that time, puffin numbers have increased by 300%!

The **Old Lighthouse** presents an interesting challenge. Though it's a historical heritage requiring no maintenance, (14) **its remote clifftop position means it's often obscured by fog or overgrown vegetation - many visitors struggle to spot it.**

Preparation is key! Contrary to expectations, you needn't worry about booking accommodation! We assure you that most people make their last-minute decision on accommodation, and we usually have availability. *No need to pack frisbees – we provide free beach games! Plus,* Our nature provides ample amusement. (15) **However, do prepare something to eat for your meal as dining options are limited.**

For those seeking authentic experience, (16) **our stone cottages is your best choice. Some of them remained its primitive state, which means complete off grid, just oil lamps.** Campers should note that while our **camping sites** allow portable generators, the **main village** does have solar-powered electricity in central buildings.

Remember, Lundy isn't your typical island getaway - it's a chance to truly disconnect and immerse yourself in raw nature. Any questions?

Before you hear the rest of the talk, you have some time to look at questions 17 to 20.

Now listen and answer questions 17 to 20.

Let's now take a look at Lundy Island's map and examine the most popular hiking route among visitors. You can see the Side Path running along the eastern side of the entire island, stretching from south to north.

Jetty is so called as it is the only beach on Lundy where boats may land. (17) **Marisco Castle stands at the southern end of the island, and is a must-visit attraction, after landing at the**

Jetty, you'll soon find it, just before reaching the Village.

The village comprises 23 rental cottages, including notable accommodations, along with a museum and solar-powered facilities. Northwest of the village stands the Old Lighthouse, now preserved as a historic site. (18) **Also, the new lighthouse situated considerably far away from the old one, and it locates at the northernmost end of the island.** It's a modern automated structure powered entirely by solar energy.

The Quarter Wall serves as both an ancient stone boundary dividing the island's southern and northern sections and one of the primary hiking trails. (19) **If you follow the Quarter Wall, it will lead you to the Fresh Water Pond, situated precisely between the Quarter Wall and Halfway Wall.** It's the largest pond on Lundy, which was constructed to store water during the, often dry, summers.

For birdwatching enthusiasts, Lundy offers exceptional wildlife observation **hotspots**. When you walk past the halfway wall, you can see the birds at the east side of the island. (20) **But the best sea bird observation point currently lies on the western coastline. To reach it, you walk along the Side Path again, and turn left, then you walk down the Threequarter Wall.** This vantage point offers unparalleled access to observe puffins during their breeding season, where you can witness their vibrantly colored beaks and endearing waddling gait at remarkably close range.

Finally, don't forget to check out those amazing cliffs and other cool spots while you're here! So, anyone got any questions before we finish up?

That's the end of Part2. You now have half a minute to check your answers.
