

和豆包的对话_0825

用户：

- 帮我生成word：完整原文（证据句红色加粗 + Q号标注）梳理原文逻辑，在每段后面加上翻译和出题人底层逻辑
- 逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）都不能省略字，一题一答案加详细解析
- 高频词汇 + 同义替换单独列出来，原文不能省略，必须高亮答案句，解析中英文相结合，尽量详细一点。

豆包：

A closer examination of a study on verbal and non-verbal messages 雅思阅读备考资料

一、完整原文（证据句红色加粗 + Q号标注）+ 段落翻译 + 出题人底层逻辑

引言段

A study of non-verbal communication carried out in 1967 continues to be widely quoted today.-
David Lapakko looks at limitations in the original study (隐含考点：全文核心——分析研究局限).

段落翻译

1967年开展的一项非语言沟通研究至今仍被广泛引用，大卫·拉帕科（David Lapakko）将剖析该原始研究的局限性。

出题人底层逻辑

1. 开篇点明全文核心：以“研究被广泛引用”反衬“存在局限”，制造矛盾吸引读者；
2. 无直接对应题目，但为后文“研究描述→局限分析→启示→结论”的逻辑链铺垫，需关注“-limitations”这一核心线索。

Paragraph 1: Description of the Study

The findings of a study on **verbal and non-verbal messages in communication** by Albert-Mehrabian and his colleagues at UCLA in 1967 have been quoted so frequently that they are now often regarded as a self-evident truth.

In the first experiment, subjects were asked to listen to a recording of a female saying the word-“maybe” in three tones of voice to convey liking, neutrality, and disliking. The subjects were then shown **photos of female faces expressing the same three emotions** and were asked to-guess the **emotions** in the recorded voice and the photos (Q28, Q29). It was found that the photos-received more accurate responses than the voices. In the second experiment, subjects listened to-nine recorded **words spoken in different tones of voice. Three words had positive meanings (-e.g. honey), three were neutral (e.g. oh), and three were negative (e.g. terrible)** (Q30). Again-, the subjects had to guess the speaker’s emotions. It was found that tone of voice carried more-meaning than the individual words. From these experiments the researchers concluded that 7%-of our feeling towards a speaker is based on the actual words they use, 38% on their tone of voice-, and 55% on their body language (e.g. facial expression).

段落翻译

加州大学洛杉矶分校（UCLA）的阿尔伯特·梅拉比安（Albert Mehrabian）及其同事1967年开展的-**语言与非语言沟通信息研究**，其结论被频繁引用，如今常被视为不证自明的真理。

第一个实验中，受试者收听一名女性用三种语调说“maybe”（可能）的录音，分别传递“喜爱”“中立”“厌恶”三种情感；随后他们观看**表达相同三种情感的女性面部照片**，并需判断录音和照片中的**情感**。结果显示，照片的情感判断准确率高于录音。第二个实验中，受试者收听9个用不同语调朗读的**单词录音**：3个含积极意义（如“honey”，亲爱的）、3个中立（如“oh”，哦）、3个含消极意义（如“terrible”，糟糕），同样需判断说话者的情感。结果显示，语调比单个单词传递更多意义。-研究者从实验中得出结论：我们对说话者的感受，7%基于其使用的实际词汇，38%基于语调，55%基于肢体语言（如面部表情）。

出题人底层逻辑

1. 多考点集中段（Q27-30，摘要填空）：

•

Q27（比较对象）：“study on verbal and non-verbal messages in communication”对应“- comparing the effects of verbal and non-verbal communication”，考查“研究核心对比维度”；

- Q28（判断内容）：“guess the emotions”对应“identify the feelings being communicated”，考查“实验任务细节”；
- Q29（第一实验要素）：“photos of female faces”对应“facial expressions”，考查“实验变量细节”；
- Q30（第二实验要素）：“words had positive/neutral/negative meanings”对应“word-meanings”，考查“实验变量细节”；

2. 出题人以“实验步骤+结论”展开，通过“first experiment→second experiment”清晰分层，用“- emotions/feelings” “facial photos/facial expressions” “word meanings”等同义替换设置填空，需关注“实验变量（语调、面部、词义）”和“核心动作（guess emotions）”。

Paragraph 2: Methodological Issues

However, a closer look at the study reveals several limitations. The first is that **the entire study involved only 62 subjects. Of these, 25 were used to select the word for the first experiment, while the key issue – comparing verbal and non-verbal communication – was determined by only the 37 remaining subjects** (Q31). All were female undergraduates who participated as part of their introductory psychology course, and **their ages and academic qualifications seem remarkably uniform. Thus, the findings may simply be a product of the nature of the sample** (Q32).

Critics have also pointed out that the 7–38–55 formula is flawed since it was pieced together from two different experiments, neither of which involved all three channels (verbal, vocal, and facial). In addition, in the first experiment the single word “maybe” was used throughout so it was impossible for the effects of changes in verbal input to be assessed. **The researchers intentionally used a “neutral” word so naturally the subjects found little meaning there. Clearly, such a methodology lacks validity** (Q34). In the real world, people communicate in a particular context and speak in phrases and full-blown sentences, making extensive use of the multi-faceted vehicle of language.

My concern is that interpretations of this study have gained such prominence in our pedagogical literature. This 7–38–55 formula appears in many basic texts, used for training in public speaking, interpersonal communication, and organizational communication.

段落翻译

然而，深入分析会发现该研究存在多处局限：首先，整个研究仅涉及62名受试者，其中25人仅用于为第一个实验筛选单词，而核心问题——比较语言与非语言沟通——仅由剩余37人决定。所有受试者均为女性本科生，参与研究是其心理学入门课程的一部分，年龄和学历高度统一，因此研究结论可能只是样本属性的产物。

批评者还指出，7-38-55公式存在缺陷：它由两个独立实验拼凑而成，且两个实验均未涵盖全部三种沟通渠道（语言、语调、面部表情）。此外，第一个实验全程使用“maybe”这一个单词，无法评估语言输入变化的影响。研究者刻意选择“中立”单词，导致受试者自然无法从中获取多少意义，这种方法显然缺乏有效性。现实中，人们在特定语境下沟通，使用短语和完整句子，充分发挥语言的多维度功能。

我担忧的是，该研究的解读在教学文献中占据重要地位：7-38-55公式出现在许多基础教材中，用于公共演讲、人际沟通和组织沟通培训。

出题人底层逻辑

1. 多考点集中段（Q31-35，判断题）：

- Q31（样本量局限）：“only 62 subjects” “key issue determined by 37” 对应 “too few-subjects”，故为YES；
- Q32（样本背景优势）：“ages and qualifications uniform” 被视为 “sample nature flaw”，与 “advantage” 矛盾，故为NO；
- Q33（实验顺序）：原文未提及“实验顺序应更换”，故为NOT GIVEN；
- Q34（中性单词帮助）：“neutral word... lacks validity” 与 “helpful” 矛盾，故为NO；
- Q35（多语言有效性）：原文未提及“多种语言”，故为NOT GIVEN；

2. 出题人通过“first→also→in addition”分层列举局限，用“only” “uniform” “lacks validity”等负面词强化缺陷，设置“细节判断（样本量、背景）”和“观点判断（方法有效性）”类考点，需关注“否定词（impossible, lacks）”和“因果词（thus）”。

Paragraph 3: Lessons to consider

Clearly, one appealing aspect of the Mehrabian study is **its numerical precision**. **Communication is a complex phenomenon, but it seems less so when we can rely on these three magical numbers** (Q36). In contrast to the ambiguities of language, numbers seem to possess exactness. And the popular appeal of the study has given the 7-38-55 formula enormous credibility. There is a certain mystique about non-verbal communication, and the continued references to this research sustain it, **encouraging people to believe in the overwhelming importance of the non-verbal message compared with the verbal one. Yet we know that-**

even one ill-chosen word to a colleague or friend can make or break a communicative effort. Words do matter (Q37).

Bradley (1991), one of the few textbook writers to criticize the Mehrabian study, makes the same point when he observes, “If we could communicate 93% of information and attitudes with vocal and facial cues, it would be wasteful to spend time learning a language” (Q38).

Mehrabian himself believes his research should not be interpreted to devalue the role of language in communication, saying: “Please remember that all my findings... dealt with communications of feelings and attitudes... it is absurd to imply or suggest that the verbal portion of all communication constitutes only 7% of the message... anytime we communicate abstract relationships (e.g., $x = y - \text{the square of } z$) clearly 100% of the entire communication is verbal.” (Mehrabian, 1995) (Q39).

To be fair, many textbook writers attempt to be faithful to the context of Mehrabian’s research. For example, Stewart and D’ Angelo (1988) write: “Mehrabian argues that when we’re uncertain about what someone’s feeling, or about how much we like him or her, we rely... only 7% on the words that are spoken.” Others try to play down the specific percentages, saying that an understanding of the general importance of non-verbal cues is more important. **Nonetheless, other textbook authors simply use the numbers without placing any limits on their meaning** (Q40).

段落翻译

显然，梅拉比安研究的一大吸引力在于其**数字精确性**：沟通是复杂现象，但有了这三个“神奇数字”，它似乎变得简单。与语言的模糊性不同，数字看似具有精确性。该研究的流行赋予7-38-55公式极高可信度：非语言沟通本身带有神秘感，对该研究的持续引用加剧了这种神秘感，**促使人们认为非语言信息远比语言信息重要**。但我们知道，对同事或朋友说一个不当的词，就可能决定沟通的成败——语言绝非无关紧要。

布拉德利（Bradley, 1991）是少数批评该研究的教材作者之一，他提出相同观点：“若我们能用语调与面部线索传递93%的信息和态度，花时间学习语言就是浪费。”

梅拉比安本人也认为，其研究不应被解读为“贬低语言在沟通中的作用”，他表示：“请注意，我的所有研究结论……均针对情感与态度的沟通……暗示‘所有沟通中语言部分仅占7%’是荒谬的……当我们沟通抽象关系（如 $x = y - z$ 的平方）时，显然100%的沟通依赖语言。”（梅拉比安，1995）

公平地说，许多教材作者试图忠实还原该研究的语境。例如，斯图尔特和迪安杰洛（Stewart & D’ Angelo,

1988）写道：“梅拉比安认为，当我们不确定他人的感受或对其好感程度时，我们仅7%依赖对方所说的话。”另一些作者则淡化具体百分比，认为理解非语言线索的总体重要性更关键。然而，还有部分作者直接使用这些数字，未对其适用范围加以限制。

出题人底层逻辑

1. 多考点集中段（Q36-40，单选题）：

- Q36（数字精确性）：“appealing aspect is its numerical precision” 对应 “makes the claims more attractive”，考查“观点细节”；
- Q37（公式流行度）：“encouraging people to undervalue verbal message” 对应 “leading to an undervaluing of words”，考查“影响判断”；
- Q38（布拉德利观点）：“wasteful to learn language if 93% via non-verbal” 反推 “language is important since we learn it”，考查“反语理解”；
- Q39（梅拉比安自述）：“findings dealt with feelings and attitudes” 对应 “relevant to only one area of communication”，考查“观点细节”；
- Q40（“To be fair” 段目的）：“many writers... Others... nonetheless other authors” 对应 “present varying interpretations”，考查“段落目的”；

2. 出题人通过“研究者观点→批评者观点→原作者澄清→教材解读”展开，用“yet” “nonetheless” - 强化对比，设置“观点理解（数字吸引力、语言价值）”和“段落功能（目的判断）”类考点，需关注“引用句（直接引语）”和“过渡词（to be fair, nonetheless）”。

Paragraph 4: Conclusion

Since this relatively small study was first published it has achieved an influence far beyond its intended scope. We need to put it into its proper perspective and learn some important lessons from it regarding social science research, communication pedagogy, and the forces which have created widespread misunderstanding about communication.

段落翻译

这项规模相对较小的研究自发表以来，影响力远超预期。我们需正确看待它，并从中吸取关于社会科学研究、沟通教学，以及导致沟通认知普遍误解的因素的重要启示。

出题人底层逻辑

1. 收尾段，无直接对应题目，但总结全文“研究影响→正确态度”，呼应开篇“局限分析”；
2. 出题人通过“far beyond its intended scope”强调研究的“过度影响”，为“需正确看待”的结论铺垫，需关注“总结性词汇（lessons, misunderstanding）”。

二、逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）

Questions 27–30（摘要填空）

完整题干

Complete the summary using the list of words and phrases, A–H, below. Write the correct letter, A–H, in boxes 27–30 on your answer sheet.

Mehrabian's 1967 study Albert Mehrabian and his colleagues carried out an influential study comparing the 27 _____ of verbal and non-verbal communication. This involved two experiments. In both experiments, subjects had to identify the 28 _____ being communicated by other people. The two main areas focused on in the first experiment were voice tones and 29 _____, while the second focused mainly on voice tones and 30 _____.

List of words and phrases: A facial expressions B purposes C printed words D effects E word-meanings F gender differences G feelings H characteristics

27.

- 完整题干：阿尔伯特·梅拉比安及其同事开展了一项有影响力的研究，比较语言与非语言沟通的_____。
- 答案：D
- 中文解析：根据“Description of the Study”段，研究核心是“语言与非语言信息在沟通中的作用（verbal and non-verbal messages in communication）”，即比较两者对沟通的“影响（effects）”。选项A（面部表情）、B（目的）、H（特征）均非研究比较对象；C（印刷文字）、F（性别差异）原文未提及；故填D。
- English Explanation: According to the "Description of the Study" paragraph, the study focuses on "verbal and non-verbal messages in communication", i.e., comparing their "effects" on communication. Options A (facial expressions), B (purposes), H (characteristics) are not the comparison targets; C (printed words), F (gender differences) are not mentioned; so the answer is D.

28.

- **完整题干：**在两个实验中，受试者都必须识别他人所传递的_____。
- **答案：** G
- **中文解析：**根据“Description of the Study”段，两个实验均要求受试者“guess-the emotions（判断情感）”，“emotions”与“feelings（感受）”为同义替换。选项A（面部表情）是第一实验的“载体”，非“识别内容”；B（目的）、D（影响）原文未提及；故填G。
- **English Explanation：** According to the "Description of the Study" paragraph, both experiments required subjects to "guess the emotions", and "emotions" is a synonym for "feelings". Option A (facial expressions) is the "carrier" in the first experiment, not the "content to identify"; B (-purposes), D (effects) are not mentioned; so the answer is G.

29.

- **完整题干：**第一个实验聚焦的两个主要领域是语调和_____。
- **答案：** A
- **中文解析：**根据“Description of the Study”段，第一个实验中，受试者需判断“recorded-voice（语调）”和“photos of female faces（女性面部照片）”，“面部照片”即“facial expressions（面部表情）”。选项C（印刷文字）、E（词义）是第二实验内容；F（性别差异）原文未提及；故填A。
- **English Explanation：** According to the "Description of the Study" paragraph, the first-experiment required judging "recorded voice (tone)" and "photos of female faces", which refers to "facial expressions". Options C (printed words), E (word meanings) are from the second-experiment; F (gender differences) is not mentioned; so the answer is A.

30.

- **完整题干：**第二个实验主要聚焦语调和_____。
- **答案：** E
- **中文解析：**根据“Description of the Study”段，第二个实验使用“nine recorded words... three had positive meanings... three neutral... three negative（9个不同意义的单词）”，即聚焦“word-meanings（词义）”。选项A（面部表情）是第一实验内容；C（印刷文字）原文未提及；故填E。
- **English Explanation：** According to the "Description of the Study" paragraph, the second-experiment used "nine words with positive/neutral/negative meanings", focusing on "word-meanings". Option A (facial expressions) is from the first experiment; C (printed words) is not-mentioned; so the answer is E.

Questions 31–35（判断题）

题干共性说明

Do the following statements agree with the views of the writer in Reading Passage 3? In boxes 31–35 on your answer sheet, write YES if the statement agrees with the views of the writer NO if the statement contradicts the views of the writer NOT GIVEN if it is impossible to say what the writer thinks about this

31. One limitation of the study was that there were too few subjects involved.

- **完整题干：**该研究的一个局限是参与的受试者太少。
- **答案：**YES
- **中文解析：**根据“Methodological Issues”段，“the entire study involved only 62 subjects... the key issue... was determined by only the 37 remaining subjects”（整个研究仅62人，核心问题仅37人参与），作者明确将“样本量少”列为“limitations（局限）”，与题干一致，故为YES。
- **English Explanation：**According to the "Methodological Issues" paragraph, "the study involved only 62 subjects, and the key issue was determined by 37", which the writer lists as a "limitation". This matches the statement, so the answer is YES.

32. The fact that the subjects in the study came from a similar background was an advantage.

- **完整题干：**受试者背景相似这一事实是该研究的优势。
- **答案：**NO
- **中文解析：**根据“Methodological Issues”段，“their ages and academic qualifications seem remarkably uniform. Thus, the findings may simply be a product of the nature of the sample”（年龄和学历高度统一，结论可能是样本属性的产物），作者认为“背景相似”是“样本缺陷”，与题干“advantage（优势）”矛盾，故为NO。
- **English Explanation：**According to the "Methodological Issues" paragraph, "similar background makes findings a product of sample nature", which the writer views as a "flaw", contradicting "advantage" in the statement, so the answer is NO.

33. The two experiments should have been carried out in a different order.

- **完整题干：**这两个实验本应按不同顺序进行。
- **答案：**NOT GIVEN
- **中文解析：**原文仅描述“first experiment→second experiment”的顺序，未提及“顺序应更换”，也未对顺序合理性评价，题干信息无依据，故为NOT GIVEN。
- **English Explanation：** The text only describes the order "first experiment→second experiment" but provides no information about "changing the order" or evaluating the order's rationality. There is no basis for the statement, so the answer is NOT GIVEN.

34. The researchers' choice of a neutral word was helpful in the context of the study.

- **完整题干：**研究者选择中立单词在该研究背景下是有帮助的。
- **答案：**NO
- **中文解析：**根据“Methodological Issues”段，“The researchers intentionally used a ‘neutral’ word so naturally the subjects found little meaning there. Clearly, such a methodology lacks validity”（刻意选择中立单词，导致受试者无法获取意义，方法缺乏有效性），作者认为“中立单词”是“缺陷”，与题干“helpful（有帮助）”矛盾，故为NO。
- **English Explanation：** According to the "Methodological Issues" paragraph, "neutral word made subjects find little meaning, and the methodology lacks validity", which the writer views as a "flaw", contradicting "helpful" in the statement, so the answer is NO.

35. The study would have been more valid if it had included a range of languages.

- **完整题干：**若该研究包含多种语言，其有效性会更高。
- **答案：**NOT GIVEN
- **中文解析：**原文仅批评研究“使用单一单词（maybe）”“样本单一”，未提及“多种语言”与“有效性”的关联，题干信息无依据，故为NOT GIVEN。
- **English Explanation：** The text only criticizes "using a single word (maybe)" and "single sample" but provides no information about "a range of languages" improving validity. There is no basis for the statement, so the answer is NOT GIVEN.

Questions 36–40 (单选题)

36. What does the writer say about the “numerical precision” of Mehrabian’s study?

A It makes the claims more attractive. B It is the strongest point of the study. C It will appeal to superstitious people. D It allows comparison between languages.

- **完整题干：**作者对梅拉比安研究的“数字精确性”有何评价？
- **答案：** A
- **中文解析：**根据“Lessons to consider”段，“one appealing aspect of the Mehrabian study is its numerical precision”（该研究的一大吸引力在于数字精确性），“appealing aspect”对应选项A “makes the claims more attractive（使结论更具吸引力）”。选项B（最强优势）原文未提及“最强”；C（吸引迷信者）原文无“迷信”相关表述；D（允许语言对比）原文未提及“语言对比”；故填A。
- **English Explanation：** According to the "Lessons to consider" paragraph, "one appealing aspect is its numerical precision", which matches option A "makes the claims more attractive". Option B (strongest point) has no "strongest" in the text; C (appeals to superstitious people) has no "superstitious" mention; D (allows language comparison) is not mentioned; so the answer is A.

37. What does the writer say about the popularity of the 7–38–55 formula?

A It is unlikely to maintain its present status. B It is leading to an undervaluing of words. C It should be applied in a more practical way. D It may help understanding of non-verbal messages.

- **完整题干：**作者对7-38-55公式的流行度有何评价？
- **答案：** B
- **中文解析：**根据“Lessons to consider”段，“the popular appeal... encouraging people to believe in the overwhelming importance of the non-verbal message compared with the verbal one. Yet we know... Words do matter”（公式流行促使人们高估非语言信息，低估语言信息，而语言实际很重要），对应选项B “leading to an undervaluing of words（导致低估语言）”。选项A（难以维持现状）原文未提及；C（应更实际应用）原文未提“应用方式”；D（帮助理解非语言信息）非作者观点，作者认为这是“误解”；故填B。
- **English Explanation：** According to the "Lessons to consider" paragraph, "popularity encourages undervaluing verbal messages, but words matter", which matches option B. Option A (unlikely to maintain status) is not mentioned; C (more practical application) has no "-

application way" mention; D (helps non-verbal understanding) is not the writer's view (it's a misunderstanding); so the answer is B.

38. What point is Bradley making about language learning?

A Language could be learned more efficiently than it is. B More research is needed into attitudes to communication. C More time should be spent looking at tone and body language. D Language must be important since we make an effort to acquire it.

- **完整题干：**布拉德利关于语言学习提出了什么观点？
- **答案：** D
- **中文解析：**根据“Lessons to consider”段，布拉德利指出“若我们能用语调与面部线索传递93%的信息，花时间学习语言就是浪费”，这是反语——实际想强调“我们既然花时间学语言，说明语言必然重要”，对应选项D “- Language must be important since we make an effort to acquire it (语言必然重要，因为我们努力学习它)”。选项A (学习效率可提高) 原文未提及；B (需更多沟通态度研究) 原文未提及；C (应多关注语调和肢体语言) 与布拉德利批评研究的立场矛盾；故填D。
- **English Explanation:** According to the "Lessons to consider" paragraph, Bradley says "learning language is wasteful if 93% via non-verbal" (irony), actually emphasizing "we learn language, so it must be important", which matches option D. Option A (more efficient learning) is not mentioned; B (more research) is not mentioned; C (focus on tone/body language) contradicts his criticism; so the answer is D.

39. What does Mehrabian himself say about his findings?

A They are relevant to only one area of communication. B It is only in maths that 100% of communication is verbal. C Feelings are more difficult to communicate than numerical facts. D- Non-verbal communication is the main part of the message.

- **完整题干：**梅拉比安本人对其研究结论有何表述？
- **答案：** A
- **中文解析：**根据“Lessons to consider”段，梅拉比安表示“all my findings... dealt with communications of feelings and attitudes... it is absurd to imply the verbal portion of all communication constitutes only 7%”（所有结论仅针对情感与态度沟通，不能推广到所有沟通），即结论“仅适用于沟通的一个领域（情感态度）”，对应选项A “They are relevant to only one area of communication (仅与沟通的一个领域相关)”。选项B (仅数学中100%语言沟通) 原文“- abstract relationships (如数学)”是例子，非“仅数学”；C (情感比数字事实难沟通) 原文未提及；D (非语言是主要部分) 与梅拉比安“不贬低语言”的立场矛盾；故填A。

- **English Explanation:** According to the "Lessons to consider" paragraph, Mehrabian says "- findings deal with feelings/attitudes, not all communication", meaning "relevant to only one-area of communication", which matches option A. Option B (only maths has 100% verbal-) misinterprets "abstract relationships (e.g. maths)" as "only maths"; C (feelings harder to-communicate) is not mentioned; D (non-verbal is main part) contradicts his "not devalue-language" view; so the answer is A.

40. What is the writer’s purpose in the paragraph beginning “To-be fair...” ?

A To justify the strong points of Mehrabian’s study.B To outline other research on non-verbal-behaviour.C To present varying interpretations of Mehrabian’s study.D To show that textbooks-tend to ignore non-verbal behaviour.

- **完整题干：**作者写以“To be fair...”开头的段落，目的是什么？
- **答案：**C
- **中文解析：**根据“To be fair...”段，作者列举三类教材作者的解读：① “faithful to the context（忠实还原语境）”；② “play down the specific percentages（淡化百分比）”；③ “simply use the numbers without limits（直接用数字无限制）”，即“呈现对该研究的不同解读”，对应选项C “To present varying interpretations of Mehrabian’s study（呈现对梅拉比安研究的不同解读）”。选项A（证明研究优点）该段是“客观列举解读”，非-“证明优点”；B（概述其他非语言研究）原文未提及“其他研究”；D（教材忽视非语言行为）与原文“教材使用公式强调非语言”矛盾；故填C。
- **English Explanation:** In the "To be fair..." paragraph, the writer lists three interpretations by-textbook authors: ① "faithful to context", ② "play down percentages", ③ "use numbers without-limits", i.e., "present varying interpretations", which matches option C. Option A (justify strong-points) is not "justify" but "list objectively"; B (outline other research) has no "other research"-mention; D (textbooks ignore non-verbal) contradicts "textbooks use the formula to emphasize-non-verbal"; so the answer is C.

三、高频词汇 + 同义替换

（一）高频词汇（词性 + 中文释义 + 原文出处）

词汇（Word）	词性（Part of-Speech）	中文释义（Chinese Definition）	原文出处（Source Paragraph）
----------	--------------------	--------------------------	------------------------

verbal	adj.	语言的；口头的	引言段/实验描述段
non-verbal	adj.	非语言的（如语调、- 肢体）	引言段/实验描述段
tone of voice	n.	语调；语气	实验描述段/方法局- 限段
facial expression	n.	面部表情	实验描述段/方法局- 限段
methodological	adj.	方法的；方法论的	方法局限段
validity	n.	有效性；效度（研究- 术语）	方法局限段
pedagogical	adj.	教学的；教育学的	方法局限段/启示段
numerical precision	n.	数字精确性	启示段
abstract relationship	n.	抽象关系（如数学公- 式）	启示段
interpretation	n.	解读；阐释	启示段/结论段

(二) 同义替换（原文词 + 替换词 + 对应题目/出处）

原文词（Original Word）	同义替换（Synonym）	对应题目/出处（Relevant Question/Source）
verbal and non-verbal messages-in communication（语言与非语言沟通信息）	the effects of verbal and-non-verbal communication-（语言与非语言沟通的影响）	Q27（实验描述段）
guess the emotions（判断-情感）	identify the feelings-being communicated（识别传递的感受）	Q28（实验描述段）
photos of female faces（女性面部照片）	facial expressions（面部表情）	Q29（实验描述段）

words had positive/neutral-/negative meanings (单词-有积极/中立/消极意义)	word meanings (词义)	Q30 (实验描述段)
only 62 subjects (仅62名受试者)	too few subjects (受试者太少)	Q31 (方法局限段)
ages and academic-qualifications uniform (年龄和学历统一)	came from a similar-background (背景相似)	Q32 (方法局限段)
neutral word...-lacks validity (中立单词缺乏有效性)	choice of a neutral word-was helpful (中立单词有帮助)	Q34 (方法局限段, 反义对比)
appealing aspect is its-numerical precision (数字-精确性是吸引力)	makes the claims-more attractive (使结论更具吸引力)	Q36 (启示段)
encouraging people to-undervalue verbal message-(促使低估语言信息)	leading to an undervaluing-of words (导致低估语言)	Q37 (启示段)
wasteful to spend time-learning a language (学语言是浪费)	language must be-important since we acquire-it (语言重要因我们学习它)	Q38 (启示段, 反语理解)
findings dealt with-communications of feelings-and attitudes (结论针对情感态度沟通)	relevant to only one area-of communication (仅与一个沟通领域相关)	Q39 (启示段)
many textbook writers.-.. Others... nonetheless-other authors (许多作者...-...另一些.....然而另一些)	varying interpretations (不同解读)	Q40 (启示段)
(豆包AI生成)
