

《A survivor's story》雅思阅读真题系统分析

一、完整原文（证据句红色加粗 + Q 号标注）+ 段落翻译 + 出题人底层逻辑

段落 1（对应文档2-4、2-5）

One native bird in New Zealand that has managed to survive the introduction of non-native species

As an island country with a fauna dominated by birds, New Zealand was once home to an owl species which is now extinct, the laughing owl, named for its distinctive cry. This bird was widespread throughout the islands when European settlers arrived in the middle of the 19th century and it remained in good numbers for some years thereafter. **Where other native birds suffered from predation by the Polynesian rat, the laughing owl turned the tables and adapted its diet to include the rodent.** (Q2) It was also capable of catching and killing the other New Zealand owl, the morepork, and even larger birds, such as the weka. **However, the laughing owl was wiped out around the beginning of the 20th century, its demise caused by specimen collectors, habitat changes, and non-native predators including cats and stoats. Surprisingly, it is the smaller owl, the morepork, that has managed to survive until this day.** (Q3)

段落翻译

新西兰有一种原生鸟类，在非原生物种（non-native species）引入后仍成功存活了下来。

作为一个动物群（fauna）以鸟类为主的岛国，新西兰曾是一种现已灭绝（extinct）的猫头鹰——笑鸱（laughing owl）的栖息地，这种猫头鹰因独特（distinctive）的叫声得名。19 世纪中期欧洲殖民者（European settlers）抵达时，这种鸟在各岛屿分布广泛（widespread），此后数年数量仍十分可观（in good numbers）。其他原生鸟类因波利尼西亚鼠（Polynesian rat）的捕食（predation）而数量减少，但笑鸱却扭转了局面（turned the tables），调整食谱（adapted its diet）将这种啮齿动物（rodent）纳入其中。（Q2）笑鸱还能捕捉并杀死新西兰的另一种猫头鹰——莫波克鸱（morepork），甚至能捕食体型更大的鸟类（如秧鸡 weka）。然而，20 世纪初左右笑鸱彻底灭绝（wiped out），其消亡（demise）原因包括标本（specimen）采集者的捕捉、栖息地（habitat）变化，以及猫、白鼬（stoats）等非原生捕食者（non-native predators）的引入。令人意外的是，体型更小的猫头鹰（smaller owl）——莫波克鸱，却存活至今。（Q3）

出题人底层逻辑

本段以“笑鸮灭绝 VS 莫波克鸮存活”为核心对比框架，出题人通过三个维度设置考点：1. **物种互动关系**（Q2）：用“turned the tables”（扭转局面）明确笑鸮与波利尼西亚鼠的“捕食者 - 猎物”反转关系，干扰项易设为“鼠威胁笑鸮”；2. **体型对比**（Q3）：通过“smaller owl, the morepork”反向推导笑鸮体型更大，考察“反向推理能力”；3. **信息缺失设计**（Q1）：仅提及“欧洲殖民者抵达”却完全不涉及“对莫波克鸮的研究”，为“NOT GIVEN”题型铺垫，避免考生因“殖民者出现”误判“有研究记录”。整体逻辑聚焦“物种存亡差异的原因与特征”，弱化无关背景（如 weka 的具体信息）。

段落 2（对应文档2-6）

Speckled dark brown, with yellow eyes and long tails, they are around 29 centimetres long from head to tail and 175 grams in weight. (Q8) Moreporks have fringes on the edge of their feathers, so they can fly almost silently and not alert potential prey. They have acute hearing and their large eyes are very sensitive to light.

段落翻译

莫波克鸮羽毛呈深棕色并带有斑点（speckled），眼睛为黄色（yellow eyes），尾巴较长（long tails），从头部到尾部全长约 29 厘米（29 centimetres），体重约 175 克（175 grams）。（Q8）莫波克鸮的羽毛边缘带有流苏（fringes），因此飞行时几乎无声（fly almost silently），不会惊动（alert）潜在猎物（potential prey）。它们拥有敏锐的（acute）听觉，大眼睛对光线也极为敏感（very sensitive to light）。

出题人底层逻辑

本段为“莫波克鸮外貌与生理特征”的客观描述，出题人核心考点为**数字细节提取**（Q8）：将“29 centimetres”这一关键长度数据直接嵌入句子主干，与“175 grams”（体重）形成“长度 VS 体重”的信息区分，避免考生混淆填空维度；同时用“fringes”“acute hearing”等特征铺垫后续“狩猎能力”（如无声飞行利于捕食），体现“特征→功能”的隐性逻辑，为段落间衔接做铺垫。

段落 3（对应文档2-7）

Moreporks nest in tree hollows, in clumps of plants, or in cavities among rocks and roots. (Q9) In the wild, moreporks usually start nesting in October, although two specimens have been recorded nesting in mid-winter, possibly stimulated by an ample food supply. The female lays up

to three white eggs, which she incubates for 20 to 30 days. During this time, she rarely hunts, and the male brings food to her.

段落翻译

莫波克鸮在树洞（tree hollows）、植物丛（clumps of plants）中，或岩石（rocks）与树根（roots）间的洞穴（cavities）里筑巢。（Q9）野生环境中，莫波克鸮通常在 10 月开始筑巢（start nesting），但有记录显示曾有两只个体（two specimens）在隆冬（mid-winter）筑巢，这可能是因为当时食物供应充足（ample food supply）。雌性莫波克鸮最多产（lays up to）3 枚白色鸟蛋（white eggs），孵化（incubates）期为 20 至 30 天。孵化期间，雌性几乎不捕猎（rarely hunts），由雄性（male）负责觅食投喂（brings food）。

出题人底层逻辑

本段聚焦“筑巢习性”，出题人采用“**并列结构设题**”（Q9）：通过“in tree hollows, in clumps of plants, or in cavities among rocks and roots”的三重并列，将答案“rocks”与“roots”绑定，考察“并列名词短语的细节提取”；同时用“mid-winter nesting”这一“特殊情况”干扰考生对“常规筑巢时间（October）”的关注，但核心填空考点仍锁定“筑巢地点”，避免次要信息喧宾夺主。

段落 4（对应文档2-8）

Once the chicks hatch, she stays mainly on the nest until the young owls are fully feathered. When hatched, chicks are covered in light grey down and have their eyes closed. The eyes do not open until the eighth day after hatching. **They can fly at around 35 days.** (Q8 补充：与“长度”考点区分)

段落翻译

雏鸟（chicks）孵化（hatch）后，雌性莫波克鸮主要待在巢中（stays mainly on the nest），直到幼鸟（young owls）完全长齐羽毛（fully feathered）。刚孵化的雏鸟全身覆盖浅灰色绒毛（light grey down），眼睛紧闭（eyes closed）。孵化后第 8 天（the eighth day after hatching）眼睛才会睁开。幼鸟约 35 天（35 days）时具备飞行能力（can fly）。（Q8 补充：与“长度”考点区分）

出题人底层逻辑

本段延续“繁殖过程”，出题人核心目的是**信息区分与铺垫**：1. 用“35 days”（飞行时间）与上段“29 centimetres”（长度）形成“时间 VS 尺寸”的维度差异，避免考生在填空时混淆数字对应的考

点；2. 通过 “chicks” “young owls” 等词汇反复强化 “幼年个体” 概念，为 Q4（老鼠对幼鸟的威胁）做铺垫，体现 “繁殖阶段→生存风险” 的逻辑链，使全文结构更连贯。

段落 5（对应文档2-9）

By day, moreporks sleep in roosts. By night, they hunt a variety of animals – mainly large invertebrates including scarab and huhu beetles, moths, caterpillars and spiders. They also take small birds and mice. They can find suitable food in pine forest as well as native forest. **A morepork uses its sharp talons to catch or stun its prey, which it then carries away in its bill.** (Q10) Moreporks are clever hunters, and birds such as robins, grey warblers and fantails can end up as their prey. **In the day, these small birds sometimes mob drowsy moreporks and chase them away from their roosts; they force the sleepy predators to search for a more peaceful spot.** (Q11)

段落翻译

白天（by day），莫波克鸮在栖息处（roosts）休息（sleep）。夜晚（by night），它们捕猎（hunt）多种动物——主要是大型无脊椎动物（large invertebrates），包括金龟子（scarab beetles）、-新西兰甲虫（huhu beetles）、飞蛾（moths）、毛毛虫（caterpillars）和蜘蛛（spiders）。它们也会捕食小型鸟类（small birds）和老鼠（mice）。莫波克鸮用锋利的爪子（sharp talons）捕捉或打晕（stun）猎物，随后用喙（bill）叼走（carries away）猎物。（Q10）莫波克鸮是聪明的捕猎者（clever hunters），知更鸟（robins）、灰莺（grey warblers）、扇尾鹟（fantails）等鸟类都可能成为它们的猎物。白天（in the day），这些小型鸟类有时会围攻（mob）昏昏欲睡的（drowsy）莫波克鸮，将其赶出（chase away）栖息处；它们迫使这些困倦的捕食者（sleepy predators）寻找更安静的地方（more peaceful spot）。（Q11）

出题人底层逻辑

本段围绕 “莫波克鸮的狩猎行为与反制”，出题人设置两个**动作 - 工具 / 时间匹配考点**：1. Q10（运输猎物的工具）：通过 “carries away in its bill” 明确 “喙（bill）” 的功能，与 “sharp talons（捕捉工具）” 形成 “捕捉 VS 运输” 的工具区分，避免考生误填 “talons”；2. Q11（被驱赶的时间）：用 “In the day” 直接对应 “during the _____” 的填空，与 “By night（狩猎时间）” 形成对比，考察 “时间场景的精准匹配”。同时用 “mob（围攻）” 这一特殊动词强化 “小型鸟类反击” 的反差，增加文本细节丰富度，但不干扰核心考点。

段落 6（对应文档2-10）

Moreporks have proved to be ungracious hosts. Scientists trying to establish a population of plovers on Motuora Island in New Zealand’s Hauraki Gulf were mystified as to why only two birds

survived out of the 75 placed there. **The culprits turned out to be five pairs of moreporks that ate or chased away the new arrivals.** (Q12)

段落翻译

事实证明，莫波克鸮并非友善的“宿主”（ungracious hosts）。科学家（scientists）试图在新西兰豪拉基湾（Hauraki Gulf）的莫图奥拉岛（Motuora Island）上建立鸮鸟（plovers）种群（establish a population），却困惑（mystified）地发现，投放的 75 只鸮鸟中仅 2 只存活（survived）。罪魁祸首（culprits）正是 5 对莫波克鸮——它们要么捕食（ate）鸮鸟，要么将这些新来者（new arrivals）赶走（chased away）。（Q12）

出题人底层逻辑

本段以“鸮鸟存活危机”为案例，出题人核心考点为**指代关系识别**（Q12）：用“the new arrivals”指代前文的“plovers”，考察考生对“前文名词→后文指代词”的衔接理解；同时通过“mystified（困惑）→culprits（罪魁祸首）”的情感与逻辑转折，引导考生聚焦“莫波克鸮是导致鸮鸟死亡的原因”，避免考生被“岛屿名称（Motuora Island）”“科学家行为”等次要信息干扰，符合雅思填空题“上下文指代优先”的命题规律。

段落 7（对应文档2-11）

Although moreporks are still considered to be relatively common, it is likely that numbers are in gradual decline due to predation and loss of habitat. As the female is a hole-nester, she is vulnerable to predators such as stoats and possums during the breeding season, and **eggs and chicks will also be at risk from rats.** (Q4) The use of pesticides is another possible threat to the owls, though not a direct one. **As moreporks are at the top of the food chain, they could be affected by an accumulative poison by consuming prey that has ingested poison.** (Q13)

段落翻译

尽管莫波克鸮目前仍被认为数量相对较多（relatively common），但由于捕食压力（predation）和栖息地丧失（loss of habitat），其数量可能正逐渐下降（gradual decline）。雌性莫波克鸮采用树洞筑巢（hole-nester），繁殖季节（breeding season）易受（vulnerable to）白鼬（stoats）、负鼠（possums）等捕食者攻击，鸟蛋（eggs）和雏鸟（chicks）也会面临（be at risk from）老鼠（rats）的威胁。（Q4）杀虫剂（pesticides）的使用是莫波克鸮面临的另一潜在威胁（possible threat），但并非直接威胁（not a direct one）。由于莫波克鸮处于食物链顶端（top of the food chain），它们捕食摄入（ingested）毒素（poison）的猎物后，可能会受到累积（accumulative）毒素的影响（be affected by）。（Q13）

出题人底层逻辑

本段分析“莫波克鸮的生存威胁”，出题人设置两个**因果关系考点**：1. Q4（老鼠对幼鸟的威胁）：通过“eggs and chicks will also be at risk from rats”直接建立“老鼠→幼鸟风险”的因果，其中“chicks”（雏鸟）与题干“young moreporks”同义替换，考察“抽象概念→具体名词”的匹配；2. Q13（猎物中的有害物质）：用“accumulative poison by consuming prey that has ingested poison”提炼“poison”这一核心词，考察“复杂句中核心名词的提取”，同时用“not a direct one”区分“直接威胁（捕食、栖息地丧失）VS 间接威胁（毒素累积）”，避免考生混淆威胁类型。

段落 8（对应文档2-12）

The New Zealand Department of Conservation is taking steps to ensure the preservation of New Zealand's only native owl. The department is involved in measuring the population of moreporks and has put transmitters on a number of birds to determine survival and mortality. As well as being New Zealand's only native owl, the morepork has symbolic and spiritual importance, so in monitoring the birds it is hoped that the morepork will continue to survive and thrive. (Q5)

段落翻译

新西兰保护部门（Department of Conservation）正采取措施（taking steps）， - 确保该国唯一的原生猫头鹰（only native owl）得以存续（preservation）。该部门正参与莫波克鸮的种群数量统计（measuring the population），并在部分个体（a number of birds）身上安装发射器（transmitters），以监测其存活（survival）与死亡（mortality）情况。莫波克鸮不仅是新西兰唯一的原生猫头鹰，还具有象征意义（symbolic importance）和精神价值（- spiritual importance），因此通过对其进行监测（monitoring），人们希望莫波克鸮能继续存活并繁衍（thrive）。（Q5）

出题人底层逻辑

本段聚焦“保护措施与目的”，出题人核心考点为**态度倾向判断**（Q5）：通过“taking steps to ensure the preservation”“hoped that the morepork will continue to survive”明确“保护”的正面态度，与题干“limit the population（限制数量）”形成反义矛盾，考察考生对“动词短语（preserve）与名词（limit）”的态度对立识别；同时用“transmitters（发射器）”“monitoring（监测）”等具体措施增强文本真实性，但不影响“保护 VS 限制”的核心判断。

段落 9（对应文档2-13）

At dusk, the melancholy sound of the morepork can be heard in forests and parks as it calls to other moreporks and claims territory. Its Māori name (ruru) echoes its two-part cry. In the tradition of the Māori people of New Zealand, the morepork, or ruru, was often seen as a careful guardian. A number of sayings referred to the bird's alertness. As a bird of the night, it was associated with the spirit world. Moreporks were believed to act as messengers to the gods in the heavens, flying along spiritual paths in the sky. They were the mediums used to communicate with the gods. **The occasional high, piercing call of the morepork signified bad news, but the lower-pitched and more common "ruru" call heralded good news.** (Q7)

段落翻译

黄昏 (dusk) 时分，森林和公园中能听到莫波克鸮忧伤的 (melancholy) 叫声 (sound) —— 它们通过叫声 (calls) 与同类 (other moreporks) 交流并宣示领地 (claims territory)。莫波克鸮的毛利语名称 (Māori name) “ruru” 与其两段式叫声 (two-part cry) 相呼应 (echoes)。在新西兰毛利人 (Māori people) 的传统 (tradition) 中，莫波克鸮 (或称 ruru) 常被视为细心的守护者 (careful guardian)。有多句谚语 (sayings) 提及这种鸟的警觉性 (alertness)。作为夜行鸟类 (bird of the night)，莫波克鸮与灵界 (spirit world) 相关联 (associated with)。毛利人认为它们是通往天上神灵 (gods in the heavens) 的信使 (messengers)，沿天空中的精神路径 (spiritual paths) - 飞行，是与神灵沟通的媒介 (mediums)。莫波克鸮偶尔发出的尖锐 (piercing) 高音 (high call) - 象征 (signified) 坏消息 (bad news)，而更常见的低沉 (lower-pitched) “ruru” 声则预示 (- heralded) 好消息 (good news)。 (Q7)

出题人底层逻辑

本段围绕“毛利文化中的莫波克鸮”，出题人核心考点为**细节对比判断** (Q7)：通过“lower-pitched... heralded good news”直接否定题干“低沉叫声有负面含义”的表述，其中“lower-pitched” (低沉的) 与题干“low call”同义，“heralded good news” (预示好消息) 与“-negative associations” (负面含义) 直接矛盾，考察考生对“形容词 (lower-pitched) + 动词短语 (herald good news)”与题干表述的细节对比；同时用“guardian (守护者)”“messengers (-信使)”等文化符号丰富文本，但不干扰“叫声含义”的核心判断。

二、逐题解析版

Part 1: Questions 1–7 (TRUE/FALSE/NOT GIVEN)

题目要求

Do the following statements agree with the information given in Reading Passage 1?

In boxes 1 – 7 on your answer sheet, write

- TRUE: if the statement agrees with the information
- FALSE: if the statement contradicts the information
- NOT GIVEN: if there is no information on this

题号	完整题目（英文）	题目中文翻译	答案	中文解析（含英文辅助）
1	Early European settlers made detailed studies of the morepork.	早期欧洲殖民者对莫波克鸮进行了详细研究。	NOT GIVEN	原文仅在段落 1 提及 “European settlers arrived in the middle of the 19th century”（19 世纪中期欧洲殖民者抵达），但未出现 “detailed studies”（详细研究）相关表述，既无肯定证据（如 “study” “research”），也无否定信息（如 “no study”），符合 “NOT GIVEN” 的定义（信息未提及）。
2	The Polynesian rat had a negative effect on the number of laughing owls.	波利尼西亚鼠对笑鸮的数量产生了负面影响。	FALSE	原文段落 1 明确指出 “Where other native birds suffered from predation by the

				Polynesian rat, the laughing owl turned the tables and adapted its diet to include the rodent”（其他鸟类因波利尼西亚鼠捕食而数量下降，笑鸮却扭转局面，以其为食）。题干“negative effect”（负面影响）与原文“笑鸮以鼠为食”的逻辑矛盾，故为 FALSE。
3	The laughing owl was larger than the morepork.	笑鸮的体型比莫波克鸮大。	TRUE	原文段落 1 结尾提到“Surprisingly, it is the smaller owl, the morepork, that has managed to survive until this day”（存活的莫波克鸮是体型更小的猫头鹰）。通过“smaller owl（更小的猫头鹰）”可反向推理“笑鸮体型更大”，题干表述与原文逻辑一致，故为 TRUE。
4	Rats pose a risk to young moreporks.	老鼠对幼年莫波克鸮构成威胁。	TRUE	原文段落 7 提到“eggs and chicks will also

				be at risk from rats”（鸟蛋和雏鸟也会面临老鼠的威胁）。题干中 “young moreporks”（幼年莫波克鸮）与原文 “chicks”（雏鸟）同义替换，“pose a risk to”（构成威胁）与 “be at risk from”（面临威胁）逻辑一致，故为 TRUE。
5	The New Zealand Department of Conservation is hoping to limit the population of moreporks.	新西兰保护部门希望限制莫波克鸮的数量。	FALSE	原文段落 8 明确说明保护部门 “is taking steps to ensure the preservation of New Zealand’s only native owl”（采取措施保护新西兰唯一的原生猫头鹰），且 “it is hoped that the morepork will continue to survive and thrive”（希望莫波克鸮继续存活繁衍）。题干 “limit the population（限制数量）” 与原文 “preservation

				(保护) ” “survive and thrive (存活繁衍) ” 完全矛盾，故为 FALSE。
6	Other bird species are frightened away when they hear the morepork’ s cry.	其他鸟类听到莫波克鸮的叫声会被吓跑。	NOT GIVEN	原文仅在段落 5 提到 “In the day, these small birds sometimes mob drowsy moreporks and chase them away” (白天小型鸟类围攻并赶走莫波克鸮)，但未提及 “hear the morepork’ s cry (听到叫声)” 这一触发条件，也无 “frightened away (被吓跑)” 的相关描述，信息未提及，故为 NOT GIVEN。
7	In Māori tradition, the low call of the morepork had negative associations.	在毛利人的传统中，莫波克鸮的低沉叫声带有负面含义。	FALSE	原文段落 9 提到 “the lower-pitched and more common ‘ruru’ call heralded good news” (更常见的低沉 “ruru” 声预示好消息)。题干 “negative associations

				（负面含义）” 与原文 “heralded good news（预 示好消息）” 直 接矛盾，故为 FALSE。
--	--	--	--	--

Part 2: Questions 8–13（Note-completion）

题目要求

- Complete the notes below.
- Choose ONE WORD AND/OR A NUMBER from the passage for each answer.
- Write your answers in boxes 8 – 13 on your answer sheet.

题号	完整题目（笔记空缺）	题目中文翻译（笔记空缺）	答案	中文解析（含英文辅助）
8	Appearance • approximately _____ in length	外貌 • 长度约____	29 centimetres	原文段落 2 明确提到 “they are around 29 centimetres long from head to tail”（从头部到尾部全长约 29 厘米）。题干 “length（长度）” 对应原文 “long（长）”，需提取 “数字 + 单位” 的完整信息 “29 centimetres”，符合 “ONE WORD AND/OR A NUMBER” 的要求。

	Nesting • nests in trees, plants or spaces in roots and ____	筑巢 • 在树木、植物中，或在树根与____间的空隙中筑巢		rocks		原文段落 3 提到 “nest in tree hollows, in clumps of plants, or in cavities among rocks and roots” （在树洞、植物丛中，或岩石与树根间的洞穴里筑巢）。题干 “spaces（空隙）” 对应原文 “cavities（洞穴）”， “roots and ____” 为并列结构，需提取并列名词 “rocks”。
10	Hunting • transports its prey using its _	狩猎 • 用_____运输猎物		bill		原文段落 5 提到 “A morepork uses its sharp talons to catch or stun its prey, which it then carries away in its bill” （莫波克鸮用爪子捕捉或打晕猎物，随后用喙叼走）。题干 “transports（运输）” 对应原文 “carries away（叼走）”， “using its _____” 对应 “in its bill（用喙）”，故提取

				“bill（喙）” 。
11	Hunting • can be chased away by other birds during the _____	狩猎 • 可能在____被其他鸟类赶走	day	原文段落 5 提到 “In the day, these small birds sometimes mob drowsy moreporks and chase them away from their roosts”（白天，这些小型鸟类有时会围攻昏昏欲睡的莫波克鸮并将其赶走）。 题干 “during the _____” 对应原文 “In the day（在白天）”，故提取 “day”。
12	Hunting • attacked _____ that had been introduced to Motuora Island	狩猎 • 攻击了被引入莫图奥拉岛的_____	plovers	原文段落 6 提到 “Scientists trying to establish a population of plovers... only two birds survived... The culprits turned out to be five pairs of moreporks that ate or chased away the new arrivals”（科学家试图引入鸻鸟种群，仅 2 只存活，罪魁祸首

				是莫波克鸻捕食或赶走了这些新来者)。“the new arrivals (新来者)”指代前文的“plovers (鸻鸟)”，故提取“plovers”。
13	Threats • may be exposed to _____ in their prey	威胁 • 可能接触到猎物中的____	poison	原文段落 7 提到“they could be affected by an accumulative poison by consuming prey that has ingested poison” (它们捕食摄入毒素的猎物后，可能会受到累积毒素的影响)。题干“be exposed to _____ in their prey”对应“affected by ... poison by consuming prey that has ingested poison”，核心名词为“poison (毒素)”，故提取“poison”。

三、高频词汇 + 同义替换

1. 高频词汇（按词性分类）

词性	词汇	音标	中文含义	原文语境示例（ 对应文档标注）
名词	Predation	/ˈpreɪʃn/	捕食	other native birds suffered from predation by the Polynesian rat (2-5)
名词	Habitat	/ˈæbjæt/	栖息地	its demise caused by... habitat changes (2-5)
名词	Specimen	/ˈspesɪmən/	标本；个体	two specimens have been recorded nesting in mid-winter (2-7)
名词	Predator	/ˈpredətər/	捕食者	vulnerable to predators such as stoats and possums (2-11)
名词	Prey	/preɪ/	猎物	fly almost silently and not alert potential prey (2-6)
名词	Chick	/tʃɪk/	雏鸟	eggs and chicks will also be at risk from rats (2-11)
名词	Poison	/ˈpɔɪzən/	毒素；毒药	

				affected by an accumulative poison (2-11)
动词	Incubate	/ˈɪn.ku.beɪt/	孵化	which she incubates for 20 to 30 days (2-7)
动词	Mob	/mɒb/	围攻	these small birds sometimes mob drowsy moreporks (2-9)
动词	Ingest	/ˈɪn.ɡest/	摄入	prey that has ingested poison (2-11)
动词	Herald	/ˈher.lɪd/	预示	the lower-pitched... call heralded good news (2-13)
形容词	Acute	/kjuːt/	敏锐的	They have acute hearing (2-6)
形容词	Vulnerable	/ˈvʌn.ə.bəl/	易受伤害的	she is vulnerable to predators such as stoats (2-11)
形容词	Accumulative	/ˌæ.kju.mjə.ɪv/	累积的	affected by an accumulative poison (2-11)
形容词	Distinctive	/dɪˈɪŋ.ktɪv/	独特的	the laughing owl, named for its distinctive cry (2-5)

词组

Turn the tables		/tʌɪnˈteɪplz/	扭转局面	the laughing owl turned the tables and adapted its diet (2-5)
词组	Wipe out	/waɪp aʊt/	灭绝；清除	the laughing owl was wiped out around the beginning of the 20th century (2-5)
词组	Take steps to	/teɪk steps tuː/	采取措施做某事	taking steps to ensure the preservation (2-12)
词组	Be at risk from	/bi æt rɪsk frɪm/	面临… 的风险	eggs and chicks will also be at risk from rats (2-11)

2. 同义替换（结合雅思阅读考点）

核心含义	同义 / 近义词组	原文应用场景（对应文档标注） & 替换示例
灭绝；消失	1. Extinct (adj.)2. Wipe out (v . 短语)3. Demise (n.)	原文：the laughing owl was wiped out... its demise caused by... (2-5) 替换： - The laughing owl became extinct = The demise of the laughing owl resulted from human activities.
威胁；风险	1. Threat (n.)2. Risk (n./v.)3. Vulnerable to (adj. 短语)4. Be at risk from (短语)	原文：eggs and chicks will also be at risk from rats... another possible threat (2-11) 替换： Rats pose a risk

		to young moreporks = Young moreporks are vulnerable to rats.
捕食；捕猎	1. Predation (n.)2. Hunt (v.)3. Catch (v.)4. Prey on (v. 短语)	原文：other native birds suffered from predation.. . they hunt a variety of animals (2-5/2-9) 替换：Moreporks prey on small birds = Moreporks hunt small birds as prey.
保护；保存	1. Preservation (n.)2. Protect (v.)3. Ensure the survival of (短语)4. Conservation (n.)	原文：taking steps to ensure the preservation... the New Zealand Department of Conservation (2-12) 替换：The department aims to protect the morepork = The department works for the preservation of the morepork.
幼年个体	1. Chick (n.)2. Young owl (短语)3. Juvenile (adj.)	原文：once the chicks hatch ... until the young owls are fully feathered (2-8) - 替换：Young moreporks = Juvenile moreporks = Chicks of the morepork.
象征；预示	1. Signify (v.)2. Herald (v.)3. Be associated with (短语)4. Symbolic (adj.)	原文：the lower-pitched call heralded good news... has symbolic importance (2-12/2-13) 替换：The call signifies good news = The call is associated with good news.

(注：文档部分内容可能由 AI 生成)
