

和豆包的对话_0826

用户：

- 帮我生成word：完整原文（证据句红色加粗 + Q号标注）梳理原文逻辑，在每段后面加上翻译和出题人底层逻辑
- 逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）都不能省略字，一题一答案加详细解析
- 高频词汇 + 同义替换单独列出来，原文不能省略，必须高亮答案句，解析中英文相结合，尽量详细一点。

豆包：

The Tasmanian Tiger 雅思阅读备考资料

一、完整原文（证据句红色加粗 + Q号标注）+ 段落翻译 + 出题人底层逻辑

Paragraph 1

The Tasmanian tiger, or thylacine, was a carnivorous marsupial (a meat-eating mammal which carries its young in a pouch). It was given the name ‘tiger’ because it had **striped fur**, and because it was ferocious (Q14). Between 24 million and 15 million years ago, many types of thylacine roamed across **Australia**, their powerful jaws playing a role in maintaining a balance in the ecosystems of their day (Q15). Some species were fox-sized, while others were barely the size of kittens.

段落翻译

塔斯马尼亚虎（又称袋狼，thylacine）是一种食肉有袋动物（以肉为食、用育儿袋携带幼崽的哺乳动物）。它被称为“虎”，是因为拥有**带条纹的皮毛**，且性情凶猛。2400万至1500万年前，多种袋狼在**澳大利亚**大陆游荡，它们强有力的颌部对维持当时的生态平衡起到重要作用。有些袋狼体型如狐狸，- 有些则仅小猫般大小。

出题人底层逻辑

1. 多考点集中段（Q14、Q15，摘要填空）：

- Q14：通过“striped fur”提取“striped”，考查袋狼的外形特征（皮毛）；
- Q15：通过“roamed across Australia”提取“Australia”，考查袋狼的原始分布地；

2. 以“袋狼定义→名称由来→历史分布”展开，用“because”解释名称与外形的关联，出题人侧重“- 基础信息细节（外形、地点）”，直接为摘要填空提供答案；

3. 用“24 million and 15 million years ago”“fox-sized”“kittens”量化时间和体型，增强文本客观性，为后文“数量下降”铺垫时间背景。

Paragraph 2

But when a period of climate change cooled Australia about **12 million years ago**, the numbers of these ancient thylacines began to decline (Q16). By about 3 million years ago, only one species was left. About 4,000 years ago, these vanished completely from the Australian mainland, so that **Tasmania**, a large island to the south of Australia, became the last remaining place where thylacines existed (Q17). They ruled the island's animal life unchallenged until **Europeans**-with sheep, dogs and a great indifference to native flora and fauna-seem to have brought about their extinction (Q18). In 1936, the last captive Tasmanian tiger died in Hobart Zoo. Since then, many expeditions have searched for tigers in the Tasmanian bush, but no definitive evidence has been found. Despite this, there are many who keep searching.

段落翻译

但约**1200万年前**，澳大利亚因气候变化进入寒冷期，这些古老袋狼的数量开始下降。到约300万年前，仅存一种袋狼。约4000年前，袋狼从澳大利亚大陆彻底消失，因此澳大利亚南部的大岛——**塔斯马尼亚（Tasmania）**

成为袋狼最后的栖息地。它们在岛上的动物世界中无天敌统治，直到**欧洲人**到来——带着绵羊、狗，- 且对本土动植物漠不关心——似乎导致了袋狼的灭绝。1936年，最后一只圈养袋狼死于霍巴特动物园。此后，多次探险队在塔斯马尼亚丛林中搜寻袋狼，但未发现确凿证据。尽管如此，仍有许多人坚持搜寻。

出题人底层逻辑

1. 多考点集中段（Q16、Q17、Q18，摘要填空）：

- Q16：通过 “about 12 million years ago... numbers began to decline” 提取 “12 million years-”，考查袋狼数量下降的时间；
- Q17：通过 “Tasmania... became the last remaining place” 提取 “Tasmania”，考查袋狼最后的栖息地；
- Q18：通过 “Europeans... brought about their extinction” 提取 “Europeans”，考查导致袋狼灭绝的关键群体；

2. 以 “气候变化→数量下降→大陆消失→塔斯马尼亚残存→欧洲人导致灭绝” 的时间线展开，用 “but” - “so that” “until” 串联逻辑，出题人侧重 “时间节点” 和 “关键事件参与者”，为摘要填空提供连续的-细节依据；

3. 用 “last captive... died in 1936” “no definitive evidence” 引出后文 “目击事件与争议”，形成 “-灭绝→搜寻→争议” 的逻辑链。

Paragraph 3

In 1981, Dutch-born zoologist Hans Naarding was in Tasmania conducting a survey of Latham's snipe, a species of endangered bird. One night, he saw an animal in the light from the searchlight mounted on his vehicle. He described it as about the size of a large dog, but with slightly sloping hindquarters and a fairly thick tail continuing straight on from its backbone. He said that it had 12 distinct stripes on its back, running down to the point where the tail began. He reported the sighting to the Director of Tasmania's National Parks. **“When the news broke,” said Naarding, “I was besieged by television crews, including four or five from Japan, and others from the United Kingdom, Germany, New Zealand and South America”** (Q23).

段落翻译

1981年，荷兰裔动物学家汉斯·纳德林（Hans Naarding）在塔斯马尼亚调查濒危鸟类——拉瑟姆沙锥鸟（Latham's snipe）。一天晚上，他在车载探照灯的灯光下看到一只动物：体型如大型犬，后躯略倾斜，粗尾巴从脊椎处平直延伸，背部有12条清晰条纹，一直延伸到尾巴根部。他将此次目击报告给塔斯马尼亚国家公园主任。纳德林说：“消息曝光后，我被电视记者团团围住，包括四五支日本团队，还有来自英国、德国、新西兰和南美的团队。”

出题人底层逻辑

1. 核心考点（Q23，人物匹配）：通过“besieged by television crews from Japan, UK, Germany...” - 体现“国际关注”，对应题干“international interest”；
2. 以“目击背景→动物描述→后续影响”展开，用“described”“said”细节化目击内容，增强可信度，出题人侧重“目击事件的国际反响”，直接为人物匹配题提供依据；
3. 用“12 distinct stripes”呼应前文“striped fur”，保持袋狼外形描述的一致性，强化“可能是袋狼”的合理性。

Paragraph 4

Government and private search parties combed the region, but no further sightings were made. The tiger, as always, had escaped to its lair—a place that many insist exists only in the imagination. Others disagree: there have been more than 4,000 claimed sightings of the animal since it supposedly died out, and the average number of claims reported to the authorities each year is now 150. So is it out there? Even experts differ in opinion.

段落翻译

政府和私人搜寻队对该地区进行了全面搜查，但未再发现袋狼踪迹。袋狼一如既往地逃回了巢穴——许多人认为这个巢穴只存在于想象中。但也有人持不同意见：自袋狼被认定灭绝以来，已有超过4000人声称目击过它，如今每年向官方报告的目击声称平均达150起。那么，袋狼真的还存在吗？即使是专家，意见也不一致。

出题人底层逻辑

1. 过渡段，无直接对应题目，聚焦“搜寻结果与争议”；
2. 以“搜寻无果→正反观点→专家分歧”展开，用“but”“others disagree”强化争议，出题人通过“4000起”“150起/年”量化目击声称，为后文“专家观点对比”铺垫；
3. 用“so is it out there?”引发读者思考，自然过渡到下一段的专家辩论，保持文本连贯性。

Paragraph 5

Randolph Rose, Associate Professor of Zoology at the University of Tasmania, says that he once dreamed of seeing a thylacine, but is now convinced that his dream will go unfulfilled. The consensus among conservationists is that any animal with a population base of less-

than 1,000 is headed for extinction within 60 years. “Sixty years ago,” he says, “there was only one thylacine that we know of, and that was in Hobart Zoo. Take it from me, the tiger is gone” (Q19). But Dr David Pemberton, curator of zoology at the Tasmanian Museum, states that, despite scientific thinking that a relatively large population is required to sustain a species, “the Florida panther is down to a dozen or so animals, and, while it does have some inbreeding problems, it’s still ticking along! After all, animals can be notoriously elusive. The strange fish known as the coelacanth, with its ‘proto legs,’ was thought to have died out with the dinosaurs 70 million years ago, until a specimen was dragged to the surface in a shark net off the coast of South Africa in 1938” (Q22, Q26).

段落翻译

塔斯马尼亚大学动物学副教授伦道夫·罗斯（Randolph Rose）表示，他曾梦想见到袋狼，但现在确信这个梦想无法实现。环保人士的共识是，种群数量少于1000的动物会在60年内灭绝。他说：“60年前，我们已知的袋狼只有一只，就在霍巴特动物园。相信我，袋狼已经灭绝了。”但塔斯马尼亚博物馆动物学部馆长戴维·彭伯顿（David Pemberton）博士认为，尽管科学界认为物种存续需要较大种群，但“佛罗里达黑豹仅存十几只，虽然存在近亲繁殖问题，却仍在存活！毕竟，动物的隐蔽性众所周知。一种长着‘原始腿’的奇特鱼类——腔棘鱼（coelacanth），曾被认为在7000万年前与恐龙一同灭绝，直到1938年，南非海岸的鲨鱼网中捞起了一只活体样本。”

出题人底层逻辑

1. 多考点集中段（Q19、Q22、Q26，人物匹配+选择题）：
 - Q19：通过Randolph Rose的“the tiger is gone”体现“无寻找希望”，对应题干；
 - Q22：通过David Pemberton的“Florida panther down to a dozen... still ticking along”质疑“种群数量需庞大”的专家观点，对应题干；
 - Q26：通过腔棘鱼例子“thought to have died out... until a specimen was found”支撑“灭绝观点可能错误”，对应选择题；
2. 以“罗斯的‘灭绝论’→彭伯顿的‘存续可能论’”展开，用“but”强化观点对立，出题人侧重“专家观点的核心论据（种群数量、腔棘鱼例子）”，分别支撑人物匹配和选择题；
3. 用“consensus among conservationists”“scientific thinking”引出主流观点，再用反例反驳，增强辩论的逻辑性，为后文“Mooney的调查”铺垫。

Paragraph 6

Wildlife biologist **Nick Mooney** has the unenviable task of investigating all so-called sightings of the tiger. It was Mooney who was first consulted in late February 2005 about the authenticity of new digital photographic images of a thylacine allegedly taken by a tourist. **“On face value,” Mooney says, “this particular account of a sighting and the photographs submitted as proof amount to one of the most convincing cases for the species’ survival that I have seen.”** (Q24). Many other ‘sightings’ have been hoaxes, and **many sincere seekers are victims of obsession.** **“It is a blind optimism that something is, rather than cynicism that something isn’t,” Mooney says. “If something crosses the road, it’s not a case of ‘I wonder what that was?’ Rather, it is a case of ‘That’s a thylacine!’ ”** (Q21).

段落翻译

野生动物生物学家**尼克·穆尼 (Nick Mooney)**

负责调查所有所谓的袋狼目击事件，这份工作并不讨好。2005年2月末，有人声称游客拍摄到了袋狼的新数字照片，穆尼是首个被咨询照片真实性的人。穆尼说：“从表面看，这次目击的描述和作为证据提交的**照片，是我见过的最能证明该物种存续的案例之一。**”

其他许多“目击事件”都是骗局，且许多真诚的搜寻者陷入了执念。穆尼说：“这是一种‘相信存在’的盲目乐观，而非‘怀疑不存在’的理性。如果有东西过马路，人们不会想‘那是什么？’，反而会直接认定‘是袋狼！’”

出题人底层逻辑

1. 多考点集中段（Q21、Q24，人物匹配）：

- Q21：通过Mooney的“blind optimism” “not a case of ‘I wonder what that was?’ ” 体现“-目击证人不客观”，对应题干；
- Q24：通过Mooney的“one of the most convincing cases” 体现“游客证据可信”，对应题干；

2. 以“Mooney的职责→具体案例评价→对目击现象的批判”展开，用“on face value” “many other” 区分不同目击事件的可信度，出题人侧重“Mooney对证据的判断”和“对目击心理的分析”，直接为**人物匹配题**提供依据；

3. 用“unenviable task” “hoaxes” “obsession” 等词体现调查的复杂性，为后文“Mooney的处理方式”铺垫。

Paragraph 7

However, Mooney treats all sightings at face value. “I never try to embarrass people,” he says, “but the fact that I don’t pack the car immediately after they telephone can often be taken as ridicule. Obsessive characters get angry that someone in my position is not out there when they think the thylacine is there.”

段落翻译

然而，穆尼对所有目击声称都持表面信任态度。他说：“我从不想让别人难堪，但我接到电话后没有立刻开车出发，这往往被误解为嘲讽。那些执念深的人会生气，觉得我这个职位的人，在他们认为袋狼出现时却不在现场。”

出题人底层逻辑

1. 补充段，无直接对应题目，聚焦“Mooney的调查态度”；
2. 以“转折（表面信任→被误解）”展开，用“however”呼应前文对目击的批判，体现Mooney的同理心，出题人通过“never try to embarrass people”“taken as ridicule”展现调查中的人情考量，丰富人物形象；
3. 无考点但完善“调查流程”的描述，与前文“客观分析目击心理”形成“理性分析+感性处理”的对比，使人物更立体。

Paragraph 8

Hans Naarding, whose sighting of a striped animal two decades ago was the highlight of a lifetime of animal spotting, remains puzzled by the time and money people waste on tiger-searches. He says resources would be better applied to saving another endangered animal, the Tasmanian devil, and helping declining migratory bird populations. Could the thylacine still be out there? “Sure,” Naarding says. “I know the vast south-west wilderness of Tasmania well. They could survive ... [But] if this is the case, it will not be long before they do disappear completely.” Naarding believes that any discovery of surviving thylacines would be “rather pointless.” “How do you bring a species back from extinction?” he asks. “What could you do with it? **If there are thylacines out there, they are better off right where they are**” (Q20).

Government and private search parties combed the region after Naarding’s sighting (Q25).

段落翻译

汉斯·纳德林二十年前目击带条纹动物的经历，是他毕生观察动物的高光时刻，但他仍对人们在搜寻袋狼上浪费时间和金钱感到困惑。他认为，资源应更好地用于拯救另一种濒危动物——塔斯马尼亚恶

魔（袋獾），以及帮助数量下降的候鸟。袋狼可能还存在吗？纳德林说：“有可能。我很了解塔斯马尼亚广阔的西南荒野，它们或许能存活……但如果真是这样，它们也离彻底消失不远了。”纳德林认为，即便发现存活的袋狼，也“相当无意义”。他问：“你如何让一个物种从灭绝边缘回来？能为它们做什么？**如果袋狼还在那里，让它们留在原地就是最好的选择。**”

纳德林目击事件后，政府和私人搜寻队对该地区进行了全面搜查。

出题人底层逻辑

1. 多考点集中段（Q20、Q25，人物匹配+选择题）：

- Q20：通过Naarding的“better off right where they are”体现“不打扰存活袋狼”，对应题干；
- Q25：通过“Government and private search parties combed the region”体现“广泛后续搜寻”，对应选择题B选项；

2. 以“Naarding的困惑→资源建议→袋狼存续的矛盾观点→

不打扰的建议”展开，用“but”“if”体现态度的复杂性，出题人侧重“Naarding的核心立场（不打扰）”和“目击后的行动（后续搜寻）”，分别支撑人物匹配和选择题；

3. 结尾回归“资源分配”的现实问题，使文本从“物种是否存在”上升到“保护优先级”，提升深度，与开篇“生态平衡”形成呼应。

二、逐题解析版（完整题干 + 答案红色加粗 + 中文解析 + English Explanation）

Questions 14–18（摘要填空）

题干共性说明

Complete the summary below. Choose NO MORE THAN TWO WORDS AND/OR A NUMBER from the passage for each answer. Write your answers in boxes 14–18 on your answer sheet.

The thylacine was a dog-like animal which had a 14 _____ coat and was carnivorous. It was originally spread widely throughout the mainland of 15 _____. However, the number of thylacine decreased in that area around 16 _____ ago because of climate change. In the end, thylacines were found only on the island of 17 _____, until the arrival of 18 _____ with their farming practices brought about a drastic reduction in thylacine numbers. The last one is thought to have died in Hobart Zoo in 1936.

14.

- **完整题干：**袋狼是一种外形似狗的动物，拥有_____皮毛，且为食肉动物。
- **答案：**striped
- **中文解析：**根据Paragraph 1，“它被称为‘虎’，是因为拥有带条纹的皮毛（it had striped fur）”。 “coat”（皮毛）对应“fur”，提取“striped”，符合“NO MORE THAN TWO WORDS AND/OR A NUMBER”要求。
- **English Explanation：** According to Paragraph 1, "the thylacine was called 'tiger' because it had striped fur". The question's "a... coat" matches "striped fur", so the answer is striped.

15.

- **完整题干：**它最初广泛分布于_____大陆。
- **答案：**Australia
- **中文解析：**根据Paragraph 1，“2400万至1500万年前，多种袋狼在澳大利亚大陆游荡（many-types of thylacine roamed across Australia）”。“the mainland of”对应“across Australia”，提取“Australia”，符合要求。
- **English Explanation：** According to Paragraph 1, "thylacines originally roamed across the-Australian mainland". The question's "the mainland of" matches "across Australia", so the answer-is Australia.

16.

- **完整题干：**然而，约_____前，受气候变化影响，该地区的袋狼数量开始下降。
- **答案：**12 million years
- **中文解析：**根据Paragraph 2，“约1200万年前，澳大利亚因气候变化进入寒冷期，这些古老袋狼的数量开始下降（about 12 million years ago... the numbers of these ancient thylacines began to-decline）”。“around... ago”对应“about 12 million years ago”，提取“12 million years”，符合要求。
- **English Explanation：** According to Paragraph 2, "thylacine numbers decreased around 12-million years ago due to climate change". The question's "around... ago" matches "about 12-million years ago", so the answer is 12 million years.

17.

-

完整题干：最终，袋狼仅在_____岛上被发现，直到_____带着他们的农耕方式到来，导致袋狼数量急剧减少。

◦ **答案：**Tasmania

◦ **中文解析：**根据Paragraph 2，“袋狼从澳大利亚大陆彻底消失，因此澳大利亚南部的大岛——塔斯马尼亚成为袋狼最后的栖息地（Tasmania... became the last remaining place where thylacines existed）”。“the island of”对应“Tasmania, a large island”，提取“Tasmania”，符合要求。

◦ **English Explanation：**According to Paragraph 2, "thylacines were finally only found on the island of Tasmania". The question's "the island of" matches this, so the answer is Tasmania.

18.

◦ **完整题干：**最终，袋狼仅在塔斯马尼亚岛上被发现，直到_____带着他们的农耕方式到来，导致袋狼数量急剧减少。

◦ **答案：**Europeans

◦ **中文解析：**根据Paragraph 2，“直到欧洲人到来——带着绵羊、狗，且对本土动植物漠不关心——似乎导致了袋狼的灭绝（until Europeans... brought about their extinction）”。“the arrival of”对应“until Europeans... arrival”，“farming practices”对应“sheep（牧羊，属农耕）”，提取“Europeans”，符合要求。

◦ **English Explanation：**According to Paragraph 2, "Europeans arrived with farming-related animals (sheep) and caused thylacine decline". The question's "the arrival of" matches "until-Europeans... arrival", so the answer is Europeans.

Questions 19–24（人物与观点匹配）

题干共性说明

Look at the following statements (Questions 19–24) and the list of people below. Match each statement with the correct person, A, B, C or D. Write the correct letter, A–D, in boxes 19–24 on your answer sheet.

NB You may use any letter more than once.

List of People A Hans Naarding B Randolph Rose C David Pemberton D Nick Mooney

19. There is no longer any hope of finding a surviving Tasmanian-tiger.

- **完整题干：**找到存活袋狼的希望已不复存在。
- **答案：** B
- **中文解析：**根据Paragraph 5, Randolph Rose (B) 表示 “相信我，袋狼已经灭绝了 (Take it from me, the tiger is gone) ”，且 “现在确信见到袋狼的梦想无法实现 (convinced that his dream will go unfulfilled) ”，明确 “无寻找希望”，与题干表述一致，故答案为B。
- **English Explanation:** Randolph Rose (B) states "the tiger is gone" and his dream of seeing a thylacine "will go unfulfilled", which matches "no hope of finding a surviving tiger". So the answer is B.

20. It would be preferable not to disturb any surviving Tasmanian-tigers.

- **完整题干：**最好不打扰任何存活的袋狼。
- **答案：** A
- **中文解析：**根据Paragraph 8, Hans Naarding (A) 认为 “如果袋狼还在那里，让它们留在原地就是最好的选择 (If there are thylacines out there, they are better off right where they are) ”， “better off right where they are” 即 “不打扰”，与题干表述一致，故答案为A。
- **English Explanation:** Hans Naarding (A) says "thylacines are better off right where they are", meaning not to disturb them. This matches the statement, so the answer is A.

21. Many who claim to have seen Tasmanian tigers are not-objective witnesses.

- **完整题干：**许多声称见过袋狼的人并非客观目击者。
- **答案：** D
- **中文解析：**根据Paragraph 6, Nick Mooney (D) 指出 “许多真诚的搜寻者陷入执念，是 ‘相信存在’ 的盲目乐观 (blind optimism)，看到东西就直接认定是袋狼 (That’s a thylacine!) ”，说明这些目击者不客观，与题干表述一致，故答案为D。
- **English Explanation:** Nick Mooney (D) says sightseers have "blind optimism" and immediately call animals "thylacines", showing they are not objective. This matches the statement, so the answer is D.

22. Expert estimates of numbers needed to ensure species survival may be inaccurate.

- **完整题干：**专家对物种存续所需数量的估算可能不准确。
- **答案：** C
- **中文解析：**根据Paragraph 5, David Pemberton (C) 反驳“物种存续需较大种群”的专家观点，举例“佛罗里达黑豹仅存十几只仍存活 (Florida panther down to a dozen... still ticking along)”，说明专家估算（如少于1000就灭绝）可能不准确，与题干表述一致，故答案为C。
- **English Explanation：** David Pemberton (C) uses the Florida panther (a dozen left but surviving-) to challenge expert views on "large population needed for survival", meaning expert estimates may be inaccurate. This matches the statement, so the answer is C.

23. There is a great deal of international interest in Tasmanian tiger-stories.

- **完整题干：**袋狼相关故事引发大量国际关注。
- **答案：** A
- **中文解析：**根据Paragraph 3, Hans Naarding (A) 提到“消息曝光后，被来自日本、英国、德国等国的电视记者团团围住 (besieged by television crews from Japan, UK, Germany...)”，体现“国际关注”，与题干表述一致，故答案为A。
- **English Explanation：** Hans Naarding (A) was "besieged by international TV crews", showing great international interest. This matches the statement, so the answer is A.

24. Some fresh evidence provided by a visitor to Tasmania seems-credible.

- **完整题干：**一位塔斯马尼亚访客提供的新证据似乎可信。
- **答案：** D
- **中文解析：**根据Paragraph 6, Nick Mooney (D) 评价游客拍摄的袋狼数字照片“是最能证明物种存续的案例之一 (one of the most convincing cases)”，“visitor”对应“tourist”，“credible”对应“convincing”，与题干表述一致，故答案为D。
- **English Explanation：** Nick Mooney (D) says a tourist' s photos are "one of the most convincing-cases" for thylacine survival, meaning the visitor' s evidence is credible. This matches the statement, so the answer is D.

Questions 25–26 (选择题)

题干共性说明

Choose the correct letter, A, B, C or D. Write the correct letter in boxes 25 and 26 on your answer-sheet.

25. Has Naarding’ s sighting of a Tasmanian tiger resulted in

- **完整题干：**纳德林对袋狼的目击是否导致了
- **答案：** B
- **中文解析：** 根据Paragraph 3和8，纳德林目击后，“政府和私人搜寻队对该地区进行了全面搜查（Government and private search parties combed the region）”，即“广泛的后续行动（an-extensive follow-up）”。选项A（捕获袋狼）、C（更多目击）、D（袋狼死亡）均无依据，故答案为B。
- **English Explanation：** After Naarding’ s sighting, "government and private search parties-combed the region" (an extensive follow-up). A (capture), C (more sightings), D (tiger death) are-not mentioned. So the answer is B.

26. The example of the coelacanth is used to show that

- **完整题干：**腔棘鱼的例子被用来表明
- **答案：** D
- **中文解析：** 根据Paragraph 5，David Pemberton用腔棘鱼例子“曾被认为与恐龙一同灭绝，直到19-38年发现活体（thought to have died out... until a specimen was found）”，证明“认定物种灭绝的观点可能错误（opinions regarding extinction can be mistaken）”。选项A（新物种进化）、B（动物有惊人特征）、C（海洋物种可拯救）均非举例目的，故答案为D。
- **English Explanation：** The coelacanth was "thought extinct but found alive", used to show "-opinions about species extinction can be mistaken". A (new species evolving), B (surprising-characteristics), C (saving sea species) are not the purpose. So the answer is D.

三、高频词汇 + 同义替换

（一）高频词汇（词性 + 中文释义 + 原文出处 + 高亮答案句）

词汇（Word）	词性（Part of-Speech）		高亮答案句（-Highlighted）

		中文释义 (- Chinese Definition)	原文出处 (- Source Paragraph)	Answer Sentence)
carnivorous	adj.	食肉的；食荤的	1	The Tasmanian tiger... was a carnivorous marsupial.
marsupial	n.	有袋动物（如袋鼠、袋狼）	1	a meat-eating mammal which carries its young in a pouch (marsupial).
striped	adj.	有条纹的	1	it had striped -fur, and- because it was-ferocious.
ecosystem	n.	生态系统	1	maintaining a balance in the ecosystems of their day.
extinct	adj.	灭绝的；绝种的	2	seem to-have brought-about their- extinction .
captive	adj.	圈养的；被俘的	2	the last captive Tasmanian tiger died in Hobart Zoo.
zoologist	n.	动物学家	3	Dutch-born zoologist Hans Naarding was in Tasmania.
consensus	n.	共识；一致意见	5	

				The consensus among conservationists is that any animal with a population base of less than 1,000 is headed for extinction.
inbreeding	n.	近亲繁殖	5	while it does have some inbreeding problems, it's still ticking along.
elusive	adj.	难以捕捉的；隐蔽的	5	animals can be notoriously elusive .
hoax	n.	骗局；恶作剧	6	Many other 'sightings' have been hoaxes .
obsession	n.	执念；痴迷	6	many sincere-seekers are victims of obsession .

(二) 同义替换 (原文词 + 替换词 + 对应题目/出处 + 高亮对应句)

原文词 (Original Word)	同义替换 (- Synonym)	对应题目/出处 (- Relevant Question/Source)	高亮对应句 (- Highlighted Matching Sentence)
		Q14 (1)	

striped fur (带条纹- 的皮毛)	striped coat (带条- 纹的皮毛)		it had striped fur - – this matches "had- a striped coat".
roamed across Australia (在澳大利- 亚游荡)	spread widely throughout the mainland of Australia (广泛分布- 于澳大利亚大陆)	Q15 (1)	many types of- thylacine roamed- across Australia - – this- matches "spread- widely throughout- the mainland of- Australia".
about 12 million- years ago (约1200- 万年前)	around 12 million- years ago (约1200- 万年前)	Q16 (2)	about 12 million- years ago , the- numbers of these- ancient thylacines- began to decline- – this matches "- around 12 million- years ago".
Tasmania... last remaining place (塔斯马尼亚...- 最后的栖息地)	found only- on the island- of Tasmania (仅在- 塔斯马尼亚岛发现)	Q17 (2)	Tasmania... became the last remaining place where thylacines existed – this matches "found only on the island of Tasmania".
Europeans... brought about their extinction (欧洲人- 导致灭绝)	arrival of Europeans... drastic reduction (欧洲人- 到来导致急剧减少)	Q18 (2)	Europeans... seem to have brought about their extinction – this matches "arrival of Europeans... drastic reduction in thylacine numbers".
the tiger is gone, dream		Q19 (5)	“Take it from me,- the tiger is gone” -

unfulfilled (袋狼已- 灭绝，梦想无法实现-)	no longer any hope- of finding (无寻找- 希望)		– this matches "no- longer any hope of- finding a surviving- Tasmanian tiger".
better off right- where they are (留- 在原地最好)	preferable not- to disturb (最好不- 打扰)	Q20 (8)	If there are- thylacines out- there, they are- better off right- where they are- – this matches- "it would be- preferable not to- disturb".
